Notes/Comments:

Costs to restore existing cropland to native prairie (local ecotypes) and wetland is being paid for by the landowner, but were not included in total project costs for this report, as restoration work will take place in sprint/summer 2008. To abide by the conservation easement, Mr Lenort restored 11 acres of cropland and 2 acres of wetland on the property in fall of 2008. A quality ecotype native grass and forb mix was used to restore the cropland back to native species.
