

APPENDIX VIII

List of Figures and Tables

List of Figures and Tables

Project Progress to Date

Figure 1: Hierarchy of Drivers

Table 1: Sustainability Elements

Figure 2: Unhealthy West Duluth waters

Figure 3: Open space in Medina

Natural Resource Profiles

Introduction

Figure 1: Marschner's map of pre-settlement land cover

Air

Figure 1: Mercury-impaired waters in Minnesota

Figure 2: Comparison of economic and emission growth factors

Figure 3: The Air Quality Index readings in Minnesota

Figure 4: Sources of electricity generation in Minnesota for 2004

Figure 5: Minnesota carbon emissions by sector

Figure 6: Emission sources of carbon dioxide

Figure 7: Commute times and change from 1990-2000

Land

Figure 1: Land cover change from 1890-1990

Table 1: Changes in cover type from 1890-1990

Sidebar: Trout Lily

Figure 2: Existing natural areas and open space in the Mankato area

Figure 3: Fire versus logging as disturbance factor in northern Minnesota forests

Figure 4: Changes in Aspen and White Pine distribution from pre-settlement to 1990

Table 2: Terrestrial plants listed as invasive by the Minnesota DNR

Figure 5: Water erosion potential for three regions in Minnesota

Figure 6: Acreages planted to hay, row crops, pasture and other annual crops

Figure 7: Changes in native land cover in the different eco-regions of Minnesota between 1890 and 1990

Figure 8: Atrazine usage and predicted leaching potential

Figure 9: Projection of future plant community distribution based on one climate change scenario

Figure 10: William O'Brien State Park

Wildlife

Figure 1: Minnesota's Ecological Provinces

Figure 2: Land cover change from 1890-1990

Figure 3: Black-throated Blue Warbler

Figure 4: Short-eared Owl

Figure 5: Area classified as farmland in Minnesota

Table 1: Route-regression analysis of grassland songbirds in Minnesota, 1966-2005

Figure 6: Nesting success of dabbling ducks as a function of % perennial cover in ND, SD, and MT

Figure 7: Wetland losses in Minnesota since Euro-American settlement times

Figure 8: Piping Plover

Figure 9: Percentage of forest by age class

Table 2: Laurentian Mixed Forest tree species distribution

Figure 10: Four-toed salamander

Figure 11: Simulated future plant community distribution

Figure 12: Bobolink on the prairie

Water

Figure 1: Surface waters in Minnesota

Figure 2: Stress gradient for the North Shore

Figure 3: Wetlands of Kandiyohi County

Figure 4: Average annual recharge rates

Figure 5: Bedrock hydrology cross-section from Geologic Atlas of Mower County

Sidebar: Water – Shared resource implications: within the state

Figure 6: Increases in total phosphorus over time in Minnesota lakes

Figure 7: Sediment Hg fluxes and ratios for selected lakes

Figure 8: Organic wastewater compounds detected in wastewater treatment plant, landfill leachate, and feedlot waste lagoon samples

Figure 9: Nitrates and chlorides in Minnesota surface waters

Figure 10: Impervious surface increase by watershed 1990-2000

Sidebar: Not so water rich

Figure 11: Surface and ground water withdrawal rates by sector

Sidebar: Water – Shared resource implications: national obligations

Figure 12: Net water use as a percent of the renewable resource

Figure 13: Atrazine usage and predicted leaching potential

Sidebar: Water – Shared resource implications: international obligations

Figure 14: Deer Lake, Itasca County

Fish

Figure 1: Cold, Cool and Warmwater Lake Classifications in Minnesota

Figure 2: Good trolling – 362 pounds of trout from White Fish Narrows, Lake of the Woods circa 1915

Figure 3: Long-term trends in dissolved oxygen levels in the Upper Mississippi

Figure 4: Spiny water flea on a fishing line

Table 1: Established aquatic invasive species of serious concern in Minnesota

Figure 5: Eurasian Watermilfoil

Figure 6: Year 2000 census of lake water clarity

Figure 7: Declines in abundance of lake herring

Figure 8: Development around north-central Minnesota lakes

Figure 9: Aerial photographs show the same shore of a Minnesota lake 64 years apart

Figure 10: Happiness on Mille Lacs

Outdoor Recreation

Figure 1: State and Federal recreation resources

Table 1: Participation figures and projections for outdoor recreation by activity

Figure 2: Population change in Minnesota - recent history (1990 - 2000) and projections (2000 - 2025)

Figure 3: Index of outdoor recreation use by age class

Figure 4: Fishing off a launch on Mille Lacs.

Figure 5: Family hike on the Superior Hiking Trail

Table 2: Indicators of nature-based outdoor recreation participation changes over the last decade for the U.S. and Minnesota

Figure 6: Blue Mounds

Figure 7: BWCA campground

Key Issues for Final Plan Phase

Figure 1: Statewide Conservation and Preservation Plan project timeline
