Total Biennial Project Budget

Result	Environmental Trust Fund	Environmental Trust Funds Spent	Environmental Trust Balance	Other Funds Proposed	Other Funds Spent
Restoration	\$50,000.00	\$50,000.00	\$0.00	\$50,000.00	\$54,870.83
Total	\$50,000.00	\$50,000.00	\$0.00	\$50,000.00	\$54,870.83

LCCMR Work Program Final Report

Restoring Minnesota's Fish and Wildlife Habitat Corridors Phase 3 Habitat Conservation Partnership

2B: Partners for Wildlife - U.S. Fish & Wildlife Service

Work Program Summary

Overall Project Outcome and Results

Since 1987, the USFWS' Partners for Fish and Wildlife (Partners) Program has restored more than 15,500 drained wetlands (66,000 acres) and seeded more than 1,000 upland sites (35,000 acres) to native grasses and forbs, on private lands in Minnesota. Since fiscal year 1999, the USFWS has expended in excess of \$1.2 million annually to deliver the Partners Program in Minnesota; such expenditures are represented by technical assistance (personnel, administrative support) and habitat restoration or enhancement (project construction) funding. Through its Partners Program, the USFWS works with other federal and state agencies, local units of government, tribal entities, conservation organizations, and individual landowners to restore or enhance fish and wildlife habitats on private land. This program emphasizes restoring habitats and native vegetation for fish and wildlife in concert with the goals of individual private landowners. These projects benefit both Minnesota landowners and the general public by providing habitat for fish, wildlife and plants, improving water quality and watershed health, reducing non-point source pollution, and creating opportunities for outdoor recreation and education.

The \$50,000.00 of Minnesota Environment and Natural Resources Trust Fund (Trust Fund) funding that was used through this work program, accelerated the USFWS' existing Partners Program with an additional voluntary restoration or enhancement 55 wetland basins covering 295.1 acres of wetland habitat. With this funding, a total of 22 projects were completed on private land within HCP Project Areas 2, 3, 4, 6, 7, and 10. These Trust Funds were expended from June 2006 through July 30, 2007.

USFWS personnel provided technical assistance (approximately \$50,000 in-kind value not reported in budget) to these private landowners who voluntarily restored wetland and upland habitat on their land. Once these habitats were restored, they are protected for no less than 10 years through agreements between the USFWS and the respective landowners. Some of the restored or enhanced project areas are protected in perpetuity by fee title acquisition or easements obtained by partnering agencies, organizations, or the USFWS (easements only). The USFWS also committed \$50,000.00 in matching funds to support this overall project. These funds were used to make payments on additional eligible wetland restoration or enhancement projects and native prairie restoration or enhancement projects.

Of the \$50,000.00 USFWS match funding committed to this work program, that dollar amount plus \$4,870.83 in additional funding for a total of \$54,870.83 has been spent to date on 14 projects. Three of these projects were completed to restore native prairie upland sites (41 acres). Five projects were brush removal projects for native prairie upland enhancement (215.4 acres). Five projects were native prairie upland enhancement projects (219.8 acres) through the Partners Program to provide funds for an additional 43 forb species on CREP II grassland restoration projects. One project was for native prairie upland enhancement (100 acres) through chemical control of invasive species and noxious weeds. Two wetland projects were completed spending \$582.26 to complete 3.9 acres in conjunction with projects funded with Trust Fund dollars. These habitat restoration projects were completed from June 2006 through July 30, 2007, and were completed on private land within HCP Project Areas 1, 4, 6, 7, 9 and 11.

Some projects involved funding contributions from the landowners or other partnering agencies or organizations. These funds are identified as "Other" in the project table as their accountability as leveraged funds is unknown.

Project Results Use and Dissemination

These habitat restoration projects were completed with private landowners on their properties within the eleven HCP Project Areas across the state of Minnesota through the USFWS' Partners for Fish and Wildlife Program. Without the willingness of the landowners involved, and the variety of other partners, this important wetland, upland and river/riparian wildlife habitat would not be restored.

Numerous presentations including the Trust Fund habitat restoration information have been made over the past five years at various meetings i.e. Minnesota State Private Lands Meeting, the Wetland Summit, the Shallow Lakes Forum, and at Kiwanis, Rotary, and Lion's Club presentations. One wetland restoration project completed with funding from this proposal was recently featured on the Minnesota Bound television program hosted by Ron Schara.

Restoring Minnesota's Fish and Wildlife Habitat Corridors Phase 3 Habitat Conservation Partnership

2B: Partners for Wildlife - U.S. Fish & Wildlife Service

Funding Type Definitions

ETF:	Grant dollars provided through the Minnesota Environment and Natural Resources Trust Fund
Other Funds:	Non-state, non-state leveraged dollars (If partner funds are leveraging state funds (e.g. RIM) they are not eligible to be considered Other Funds)
State Funds:	State Funds expended on HCP projects (not eligible for use as other funds commitment)
Partners State Leveraged Funds:	Non state funds that have leveraged state funds as part of an HCP project (not eligible for use as other funds commitment)
Other:	Any other expenditures (e.g. grant income funds)
