

# Environment and Natural Resources Trust Fund (ENRTF) M.L. 2017 Work Plan

Date of Report: June 1, 2017

**Date of Next Status Update Report:** November 1, 2017

Date of Work Plan Approval: 06/07/2017

Project Completion Date: June 30, 2020

Does this submission include an amendment request? \_\_\_

PROJECT TITLE: Scientific and Natural Areas Acquisition and Restoration, Citizen Science, and Engagement

Project Manager: Margaret (Peggy) Booth

Organization: Minnesota Department of Natural Resources, Division of Ecological & Water Resources

Mailing Address: 500 Lafayette Road, Box 25

City/State/Zip Code: St Paul, MN 55155-4025

**Telephone Number:** (651)259-5088

Email Address: peggy.booth@state.mn.us

Web Address: mndnr.gov/snas

**Location:** statewide

Total ENRTF Project Budget: ENRTF Appropriation: \$2,500,000

Amount Spent: \$0

Balance: \$2,500,000

Legal Citation: M.L. 2017, Chp. 96, Sec. 2, Subd. 09b

## **Appropriation Language:**

\$2,500,000 the first year is from the trust fund to the commissioner of natural resources to acquire at least 250 acres of land with high-quality native plant communities and rare features to be established as scientific and natural areas as provided in Minnesota Statutes, section 86A.05, subdivision 5, restore and improve at least 1,000 acres of scientific and natural areas, and provide technical assistance and outreach, including site steward events. At least one-third of the appropriation must be spent on restoration activities. A list of proposed acquisitions and restorations must be provided as part of the required work plan. Land acquired with this appropriation must be sufficiently improved to meet at least minimum management standards, as determined by the commissioner of natural resources. When feasible, consideration must be given to accommodate trails on lands acquired. This appropriation is available until June 30, 2020, by which time the project must be completed and final products delivered.

# I. PROJECT TITLE: SNA Acquisition, Restoration, Citizen Science & Engagement

#### **II. PROJECT STATEMENT:**

Conservation of the state's rarest resources through the state Scientific and Natural Areas (SNAs) will be strengthened through strategic acquisition and land protection, monitoring-based restoration and improvements, and citizen science-based action and outreach. About 250 acres of at risk native plant communities and wildlife habitat of state significance identified by the Minnesota Biological Survey (MBS) and the SNA Strategic Land Protection Plan will be acquired and designated as SNAs. Ecological information and monitoring will help guide or evaluate native habitat restoration, enhancement, and site improvement activities on about 1000 acres of SNAs threatened by human impacts, invasive species, and lack of natural disturbance regimes. Furthermore, in cooperation with Conservation Corp of Minnesota, science-based information and citizen science projects will be basis for an expanded SNA outreach initiative including 50 events and a network of SNA site stewards at 130 SNAs.

# III. OVERALL PROJECT STATUS UPDATES: Project Status as of November 1, 2017: Project Status as of April 1, 2018: Project Status as of November 1, 2018: Project Status as of April 1, 2019: Project Status as of November 1, 2019: Project Status as of April 1, 2020:

## **IV. PROJECT ACTIVITIES AND OUTCOMES:**

**Overall Project Outcomes and Results:** 

# **ACTIVITY 1: Acquisition & Protection of Sites of Biodiversity Significance**

## **Description:**

The SNA Program will protect and buffer MBS-recommended sites of biodiversity significance by acquisition and SNA designation of ~250 acres. Proactive landowner contacts will be targeted in 4 high priority opportunity areas identified in the SNA Strategic Land Protection Plan, including prairie core areas in the Minnesota Prairie Conservation Plan. In order to be acquired and designated as SNA, the site must be recommended for SNA designation in an Ecological Evaluation report which serves as the site's baseline assessment for fee acquisitions. Candidate sites are numerically evaluated with priority to MBS-mapped outstanding and high biodiversity significance sites that are predominantly MBS-mapped native plant communities with habitat for rare species and Species in Greatest Conservation Need. The attached ML2017 Parcel List and ML17 SNA Projects map set identify priority project areas for this appropriation. The DNR may request to add other qualifying sites to the list. Most acquisition will be of fee title, but if more appropriate, acquisition could be of an SNA-administered conservation easement with SNA designation.

Consideration will be given to accommodating trails on lands acquired with these funds using criteria including:

1) statutory purpose of SNAs to "protect and perpetuate in an undisturbed natural state those natural features

which possess exceptional scientific or educational value" and statutory direction that "physical development shall be limited to facilities absolutely necessary for protection, research, and educational projects, and where appropriate, for interpretive services;" 2) measures needed to appropriately protect and manage specific natural features the site would be designated to protect; 3) pre-existing trail corridors and corridors of disturbance; and 4) a commitment to long term monitoring and management responsibilities by a third party.

Conservation easement monitoring will be done on about 3 SNA-held conservation easements. The SNA Program manages 20 SNA-related conservation easements (protecting over 1510 acres within or adjoining 10 SNAs). The goal of the SNA Program is to monitor each easement every 3 years, so through this appropriation about 6 easements would receive a formal on-site monitoring visit with results entered into the department land records, landowners contacted, management opportunities identified, and follow-up visits conducted if needed to address issues discovered.

Summary Budget Information for Activity 1: ENRTF Budget: \$ 1,081,780

Amount Spent: \$0

Balance: \$ 1,081,780

Outcome	<b>Completion Date</b>
1a. acquisition as SNA of ~250 acres of high quality habitat	6/30/20
1b. proactive landowner contact in ~4 priority areas for acquisition/protection	6/30/20
1c. monitoring for ~3 SNA conservation easements	6/30/20

Note: budget for this Activity includes \$5,630 for direct & necessary services which are prorated across all costs except budgets for landowner payments; no direct & necessary charges are budgeted for the \$0.9M in landowner payments nor \$100K in transaction costs; actual charges will be based on actual expenditures.

**Final Report Summary:** 

## **ACTIVITY 2: Native Habitat Restoration, Enhancements & Improvements**

## **Description:**

Native habitat enhancement and site improvements activities will be completed on about 1000 acres at about 40 state designated SNAs as guided by ecological data and monitoring.

Habitat enhancement and improvement activities will be carried out by DNR staff/SNA crews, Conservation Corps of Minnesota, contractors Sentence to Service, and/or volunteers. Activities include invasive species treatment and woody encroachment removal; prescribed burns (or alternative prescribed disturbance for ecological management purposes, such prescribed haying, mowing or grazing, necessary where use of fire is limited); site clean-up, signing, fencing (removal or installation as needed for management purposes).

Enhancement of degraded and rare land features helps implement the Minnesota Wildlife Action Plan and achieve Habitat Recommendation 5 of the SCPP. This activity may include work to bring acquired parcels up to the DNR's minimum standards.

Summary Budget Information for Activity 2: ENRTF Budget: \$ 1,011,281

Amount Spent: \$0

Balance: \$ 1,011,281

Outcome	Completion Date
2a. ~300 acres of woody removal & exotics species treatment	6/30/20
2b. ~700 acres of prescribed burns	6/30/20
2c. development work on ~10 sites	6/30/20

Note: total budget for this Activity includes \$60,881 for direct & necessary services which are prorated across all costs except budgets for CCM contracts and MNIT service level agreement (SLAs); no direct & necessary charges are budgeted for the estimated \$127K in CCM contracts; actual charges will be based on actual expenditures.

**Final Report Summary:** 

# **Activity 3: Citizen Science & Public Engagement in Natural Areas**

Science-based information will drive the engagement of Minnesotans in citizen science, monitoring and education activities on SNAs. A partnership with the Conservation Corps of Minnesota will sustain a network of 130 SNA volunteer site stewards; organize about 50 events focusing on citizen science monitoring and bioblitzes, plus volunteer work days, and recreation-educational events (guided nature hikes, etc.) and evaluating the effectiveness of these actions. Ecological and safety training, guidance, and support materials will be provided for site stewards as necessary to recruit and retain these volunteers and ensure their work on SNAs is safe and ecologically appropriate. New and refined electronic/social media communications tools, maps, brochure, and interpretive information will be developed and disseminated to advance the public's understanding of natural systems and biodiversity science and to enhance appropriate recreational use of SNAs. Work will be accomplished in part with the involvement of two CCM individual placement positions each full time for 2 years.

Summary Budget Information for Activity 3: ENRTF Budget: \$ 406,939

Amount Spent: \$0

Balance: \$406,939

Outcome	<b>Completion Date</b>
3a. SNA website, e-book, social media, maps, brochure & other interpretive info	6/30/20
3b. ~ 50 citizen science & volunteer events (management work days & ed. events)	6/30/20
3c. network of volunteer site stewards at ~130 SNAs	6/30/20

Note: total budget for this Activity includes \$22,605 for direct & necessary services which are prorated across all costs except budgets for CCM contracts and MNIT service level agreement (SLAs); no direct & necessary charges are budgeted for the estimated \$76K in CCM contracts; actual charges will be based on actual expenditures.

## V. DISSEMINATION:

## **Description:**

Dissemination will primarily be achieved through the SNA webpage on the DNR website: <a href="mmdnr.gov/snas">mmdnr.gov/snas</a>, through the SNA Facebook page, and through *Nature Notes* – the SNA Program e-newsletter distributed through GovDelivery.com to subscribers and possibly through Tweets on the DNR Twitter site. Specifically, the DNR website will be updated with information on the new or expanded SNAs. Announcements of the acquisitions and some enhancement-related activities will be posted on the SNA Facebook page.

# **VI. PROJECT BUDGET SUMMARY:**

# A. ENRTF Budget Overview:

<b>Budget Category</b>	\$ Amount	Overview Explanation
Personnel:	\$ 802,600	Coordinators & Planner (0.9 FTE for 2 yrs);
		spec's, tech's & naturalists (3.9 FTE for 2 yrs);
		laborers, seasonal field crews & clerical (1.4 FTE
		for 2 yrs)
Professional/Technical/Service Contracts:	\$ 430,000	Contractors will be selected following state
		procurement & bidding processes:

TOTAL ENRTF BUDGET:	\$ 2,500,000	
other.	7 51,100	placement (\$2050); Direct & Necessary Services for the appropriation (\$89,116)
Other:	\$ 91.166	Computer & phone charges for CCM individual
		charges (by mile traveled or monthly charge which we pro-rate) for the specific equipment utilized for this project.
		mowers, seeders), mileage, lodging & meals as per state contracts. The fleet charges are use
Travel Expenses in MN:	\$ 132,750	maps, etc.) Fleet charges for trucks, cars, & equipment (e.g.
Printing:	\$ 6,500	State register printing of acquisition designation orders; outreach materials (e.g. brochure,
Easement Acquisition:	. ,	billings; appraisal & review; boundary survey; attorney general; closing costs; recording fees & taxes; etc. <\$20K/parcel
Professional Services for Fee Title and	\$ 100.000	Includes real estate transaction costs & LAM
Fee Title Acquisition:	\$ 900,000	~250 acres in 3-6 parcels to be designated as SNA & owned in fee by DNR
		or grazing, management plans, & monitoring; signs & posts, fencing, & other site development tools & supplies
Equipment/Tools/Supplies:	\$ 36,984	parts, tools, repair costs & supplies for invasives treatment, prescribed burning, haying, mowing
		encroachment removal & invasives treatment; prescribed burning, haying, mowing, browsing, & grazing; site development (fences, signs, etc)
		Service Contracts (including CCM) – woody
		Corps Minnesota (CCM) individual placement doing outreach
		Professional/Technical Contracts – Conservation

**Explanation of Use of Classified Staff:** Consistent with approved work plans for previous ENRTF appropriations for the SNA Program, this funding will be used to pay project-associated costs for classified and unclassified staff paid mostly with special project funds. These positions would not exist, but for special project funding received through the ENRTF and other funds. Each year these positions are assigned work based on the particular combination of soft funding available to address priority SNA Program activities.

Direct and Necessary expenses are for Department Support Services (Human Resources, IT Support, Safety, Financial Support, Communications Support, Planning Support, and Procurement Support. Department Support Services are described in the agency Service Level Agreement, and billed internally to divisions based on rates that have been developed for each area of service. These services are directly related to and necessary for the appropriation. Department leadership services (Commissioner's Office and Regional Directors) are not assessed. Those elements of individual projects that put little or no demand on support services such as large single-source contracts, land acquisitions, and funds that are passed-thru to other entities are not assessed Direct and Necessary costs for those activities. For this work plan, landowner payments (~\$900,000), acquisition professional services (\$100,000), and CCM contracts (~\$203,000) have not been assessed Direct and Necessary costs. In addition to itemized costs captured in the proposal budget, direct and necessary costs cover HR/People Support (\$18,211), Safety Support (\$5,101), Financial Support (\$16,910), Communication Support (\$6,580), IT Support (\$36,769), Planning Support (\$4,560), and Procurement Support (\$985) that are necessary to accomplishing funded programs/projects.

Explanation of Capital Expenditures Greater Than \$5,000: NA

**Number of Full-time Equivalents (FTE) Directly Funded with this ENRTF Appropriation:** 6.2 FTE each for two years spread over 25-35 positions – for a total of 12.4 FTEs

Number of Full-time Equivalents (FTE) Estimated to Be Funded through Contracts with this ENRTF Appropriation: up to 5.0 FTE for 1 year for CCM & 1.5 FTE fieldwork contractors for 1 year – for a total of 6.5 FTEs

#### **B. Other Funds:**

Source of Funds	\$ Amount Proposed	\$ Amount Spent	Use of Other Funds
Non-state	\$0	\$0	We seek landowner and partner donations for acquisitions. If any other funds are used for landowner payments for acquisitions funded in part with this appropriation, accomplishments will be pro-rated by the actual expenditures per funding source.
State**	\$0**	\$0**	Some SNA acquisitions are funded with a combination of state appropriations (e.g. OHF and RIM). If any other funds are used for landowner payments for acquisitions funded in part with this appropriation, accomplishments will be pro-rated by the actual expenditures per funding source. In-kind contributions by the project manager to administer this project and office/computer/phone costs for DNR staff work on this project will not be tracked.
TOTAL OTHER FUNDS	: \$0	\$0	

<sup>\*\*</sup> As indicated below, Outdoor Heritage Fund appropriations for acquisition and prairie restoration and enhancement occur concurrently with this ENRTF appropriation. These OHF funds are used for similar but separate projects as the ENRTF funding. Because of the multiple, overlapping appropriations, it would not be accurate to list those as match here. Also, the SNA program typically annually receives an internal general fund grant for about \$30,000 for similar but separate invasive species projects.

## **VII. PROJECT STRATEGY:**

A. Project Partners:

Partners receiving ENRTF funding – none.

# **B. Project Impact and Long-term Strategy:**

Achieving the goals of the SNA Strategic Land Protection Plan to protect 136,000 more acres as SNAs this century, as well as the science-based land management and public engagement depends upon ongoing support from the Environment and Natural Resources Trust fund of \$5M to \$10M per biennium. Annual/biennial appropriations will also be sought from the Outdoor Heritage Fund and state bonding.

# C. Funding History:

Funding Source and Use of Funds	Funding Timeframe	\$ Amount
ENRTF ML13, Ch 52, Sec 2, Subd 4b: SNA acquisition,	July 2013-June 2016	\$ 1,500,000

State Wildlife Grant (federal) – SNA management plans	March 2012-August 2013	\$ 49,800

## **VIII. REPORTING REQUIREMENTS:**

- The project is for 3 years, will begin on July 1, 2017, and end on June 30, 2020.
- Periodic project status update reports will be submitted November 1 and April 1 of each year.
- A final report and associated products will be submitted by August 15, 2020 (or as soon as possible after state fiscal year closeout).

IX. VISUAL COMPONENT or MAP(S): See attached ML17 SNA Acquisition and Restoration Projects map set.

# X. FEE TITLE ACQUISITION/CONSERVATION EASEMENT/RESTORATION REQUIREMENTS:

A. Parcel List: See attached list.

B. Acquisition/Restoration Information: Fee Title Acquisition

1. Describe the selection process for identifying and including proposed parcels on the parcel list, including explanation of the criteria and decision-making process used to rank and prioritize parcels.

To be acquired and designated as SNA, the site must be recommended for SNA designation in an Ecological Evaluation report which serves as the site's baseline assessment for fee acquisitions. All such sites are predominantly MBS-mapped native plant communities and contain habitat for rare species and Species of Greatest Conservation Need. In addition, SNA staff use the "SNA Candidate Site Evaluation Guide" (initially developed through the ENRTF-funded SNA strategic planning process) which incorporates criteria to rate which sites are currently pursued. Criteria include diversity and quality of the native habitat, occurrence of rare species, occurrence of native plant communities under-represented in SNA system, parcel size, location of parcel in relation to biodiversity hotspots (particularly MBS-mapped areas of outstanding and high biodiversity significance) and other conservation lands (including SNA Strategic Land Protection Plan's Conservation Opportunity Areas and Minnesota Prairie Conservation Plan's Core Areas), potential for long-term management, and additional factors (e.g. landowner readiness, urgency, and willingness to donate; degree of threat, and partnership opportunities).

- 2. List all adopted state, regional, or local natural resource plans in which the lands included in the parcel list are identified. Include a link to the plan if one is available.
  - SNA Strategic Land Protection Plan www.dnr.state.mn.us/eco/sna/plan
  - Minnesota's State Wildlife Action Plan <u>www.dnr.state.mn.us/cwcs</u>
  - Minnesota Prairie Conservation Plan <u>www.dnr.state.mn.us/prairieplan</u>
- 3. For any parcels acquired in fee title, a restoration and management must be prepared. Summarize the components and expected outcomes of restoration and management plans for parcels acquired by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation, including how long-term maintenance and management needs of the parcel will be financed into the future.

Each parcel acquired as a new SNA in fee will have an Adaptive Management Plan (AMP) or if as an addition to an existing SNA, that SNAs Management Plan may be amended to add the new parcel. The AMPs include goals, ecological description, priority features with indicators, and management recommendations. The intended outcome of management of SNAs is that 1) all the lands be native plant communities or restored to plant communities that would have been native to the site, 2) these plant communities are sustained over time, and 3) that visitors are accommodated safely (unless visitor access is restricted by designation order). The goals for the SNA's management are based upon soils, topography, geology, and other factors necessary to sustain the plant community. Each plan includes an implementation timetable which summarizes ongoing management needs and a statement on funding. Long-term management costs (e.g. invasive species treatments, prescribed fire, and monitoring/evaluation) will be covered by a combination funding sources, including, but not limited to, ENRTF, Outdoor Heritage Fund (OHF), federal grants, and other funds as appropriated. Each AMP is kept in a DNR internal shared electronic filing system accessible to all SNA staff.

4. For each parcel to be conveyed to a State of Minnesota entity (e.g., DNR) after purchase, provide a statement confirming that county board approval will be obtained.

The DNR follows Minnesota Statutes 84.033 which require that any land acquired for designation as a SNA must have county board approval as prescribed under MS 97A.145.

5. If applicable (see M.S. 116P.17), provide a statement confirming that written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

As part of the DNR acquisition process, all SNA acquisitions are required to have approval of the Ecological and Water Resources Division Director and land conveyances are accepted by the Director or Deputy Director of Division of Lands and Minerals who have delegated authority to approve this for the Commissioner.

## Restoration

- 1. Provide a statement confirming that all restoration activities completed with these funds will occur on land permanently protected by a conservation easement or public ownership.
  - All restoration/enhancement-related activities done with this appropriation are on lands designated as SNA which the state owns in fee or easement.
- 2. Summarize the components and expected outcomes of restoration and management plans for the parcels to be restored by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation.
  - Each restoration/enhancement project will be based upon an ecological restoration and management plan and/or project plan with goals for reconstructing plant communities that are native to the site that are based upon soils, topography, geology, and other factors necessary to sustain the plant community. Each plan includes an implementation timetable which summarizes ongoing management needs. Each restoration and management plan and project plan is kept in a DNR internal shared electronic filing system accessible to all SNA staff.
- 3. Describe how restoration efforts will utilize and follow the Board of Soil and Water Resources "Native Vegetation Establishment and Enhancement Guidelines" in order to ensure ecological integrity and pollinator enhancement.
  - The SNA Program follows or exceeds the recommendations found in the BWSR "Native Vegetation Establishment and Enhancement Guidelines". SNA restorations typically follow the current BOWSR Guidelines, including Project Guidance, Plant Community Restoration, Temporary Cover and Forest/Woodlands. The SNA Program follows the general direction of the BWSR Guidelines for "Recommended Steps for Obtaining Plant Materials", and has additional and more restrictive requirements for restoration material sources. Specifically, restoration and management of DNR lands are governed by DNR Operational Order #124 on "Plant Material Standards for Native Plant Community Restoration" and #130 on "Pollinator Habitat" (which include BMPs).
- 4. Describe how the long-term maintenance and management needs of the parcel being restored with these funds will be met and financed into the future.
  - Long-term management costs (e.g. invasive species treatments, prescribed fire/disturbance, and monitoring/evaluation) will be covered by a combination of funding sources, including, but not limited to, ENRTF, Outdoor Heritage Fund (OHF), federal grants, and other funds as appropriated.
- 5. Describe how consideration will be given to contracting with Conservation Corps of Minnesota for any restoration activities.
  - DNR has a standing general contract with CCM under which the SNA Program often does project or activity specific agreements. For restoration and site improvement projects, CCM has been and will continue to be used when appropriate for hand seed harvest, invasive species treatment, prescribed burning, and will be considered on restoration projects for post-planting weed control.
- 6. Provide a statement indicating that evaluations will be completed on parcels where activities were implemented both 1) initially after activity completion and 2) three years later as a follow-up. Evaluations should analyze improvements to the parcel and whether goals have been met, identify any problems with the implementation, and identify any findings that can be used to improve implementation of future restoration efforts at the site or elsewhere.
  - Plant community reconstruction and rehabilitation projects will be evaluated and a report submitted to the LCCMR to ascertain how well the native plants have been established and non-natives controlled. Each evaluation report will include a summary of management plan outcomes, activities completed through the project, map of the project area, statement of ongoing management needs and funding, and summary of the evaluation.

M.L. 2017 Project Budget
