

Environment and Natural Resources Trust Fund

M.L. 2020 Approved Work Plan

General Information

ID Number: 2020-053

Staff Lead: Michael Varien

Date this document submitted to LCCMR: August 13, 2021

Project Title: Private Native Prairie Conservation through Native Prairie Bank

Project Budget: \$2,000,000

Project Manager Information

Name: Judy Schulte

Organization: MN DNR - Ecological and Water Resources Division

Office Telephone: (507) 637-6016

Email: judy.schulte@state.mn.us

Web Address: <https://www.dnr.state.mn.us/ewr/index.html>

Project Reporting

Date Work Plan Approved by LCCMR: August 13, 2021

Reporting Schedule: March 1 / September 1 of each year.

Project Completion: June 30, 2024

Final Report Due Date: August 14, 2024

Legal Information

Legal Citation: M.L. 2021, First Special Session, Chp. 6, Art. 5, Sec. 2, Subd. 09b

Appropriation Language: \$2,000,000 the second year is from the trust fund to the commissioner of natural resources to provide technical stewardship assistance to private landowners, restore and enhance native prairie protected by easements in the native prairie bank, and acquire easements for the native prairie bank in accordance with Minnesota Statutes, section 84.96, including preparing initial baseline property assessments. Up to \$60,000 of this appropriation may be deposited in the natural resources conservation easement stewardship account, created in Minnesota Statutes, section 84.69, proportional to the number of easement acres acquired.

Appropriation End Date: June 30, 2024

Narrative

Project Summary: Native Prairie Bank (NPB) will help landowners conserve native prairie through multiple outreach methods, restoration and enhancement of 700 acres, and protection of 130 acres through conservation easements.

Describe the opportunity or problem your proposal seeks to address. Include any relevant background information.

Native prairie is a fragile, unique natural ecosystem that consists of thousands of different organisms, plants, animals, bacteria and soil fungi. Their complex interactions provide the food, water and shelter required by many of Minnesota's rare, threatened and endangered species. Native prairie provides a multitude of benefits to the citizens of the state, such as water filtration and recharge, pollinator and wildlife habitat, carbon sequestration, soil health, erosion control, outdoor recreation, etc. High quality native prairies provide the best available habitat for native prairie pollinators. Restoration efforts aim to meet the standards set by these original native prairies.

The Minnesota Biological Survey has identified about 249,000 acres of remaining native prairie in Minnesota, approximately 1.3% of what once existed in the state. Of these 249,000 acres, approximately 118,000 acres still have no formal protection. Threats to native prairie continue to be widespread including cropland conversion, mining, development, invasive species, woody encroachment and non-prairie focused land use/management.

What is your proposed solution to the problem or opportunity discussed above? i.e. What are you seeking funding to do? You will be asked to expand on this in Activities and Milestones.

This proposal seeks to protect and enhance high quality native prairie to insure these highly complex habitats continue to protect the habitat essential to many of the state's rare, threatened and endangered species, set the standard for native prairie pollinator habitat and provide a multitude of benefits to the citizens and animals of the state.

Established in 1987 through Minnesota Statute 84.96, Native Prairie Bank (NPB) has a proven track record of working with landowners to enhance and protect high quality native prairie while leaving the land in private ownership. In partnership with landowners, Native Prairie Bank currently manages, with exceptionally high standards, 14,181 acres of native prairie and associated habitat on 158 sites throughout the prairie region of the state. The goal is to expand this partnership and effort through this proposal.

What are the specific project outcomes as they relate to the public purpose of protection, conservation, preservation, and enhancement of the state's natural resources?

Through this proposal, prairie outreach and technical assistance will be provided to landowners, practitioners, youth and the general public. Native prairie restoration and enhancement activities will be implemented on about 700 acres of Native Prairie Banks. Permanent protection of about 130 acres will take place through the acquisition of Native Prairie Bank conservation easements with priority given to high quality remnant prairie identified by the Minnesota Biological Survey (MBS).

Project Location

What is the best scale for describing where your work will take place?

Region(s): Central, NW, SW, SE,

What is the best scale to describe the area impacted by your work?

Statewide

When will the work impact occur?

During the Project and In the Future

Activities and Milestones

Activity 1: Prairie Landowner Assistance, Prairie Outreach, and Existing Native Prairie Bank Stewardship

Activity Budget: \$467,513

Activity Description:

Private landowners and other practitioners will increase their stewardship of native prairie as a result of this project's workshops, field days, one-on-one technical assistance, online resource development, etc. The Prairie Landowner Network established through the ML18 appropriation in cooperation with Conservation Corps of Minnesota (CCM) will continue to use innovative ways to connect prairie landowners through social media, email, newsletters, training opportunities, etc. This network is aimed at improving prairie quality on private lands by keeping landowners up-to-date on the best management strategies. At least 17 landowners will receive a comprehensive prairie stewardship plan that will provide specific prairie management expertise for their property. Landowner enrollment in Native Prairie Tax Exemption will be increased to conserve and improve management of native prairie which may not be protected through other means. About 5 baseline property reports and 28 monitoring visits will be completed on existing NPBs to evaluate current conditions and insure easement compliance.

Activity Milestones:

Description	Completion Date
~9 workshops/field days for prairie landowners & practitioners (~700 people)	June 30, 2024
consultations, guidance, mgmt. asst., etc. to ~70 landowners	June 30, 2024
~40 prairie stewards participating in the Prairie Landowner Network	June 30, 2024
~17 prairie stewardship plans provided to prairie landowners (~1400 acres)	June 30, 2024
~5 baseline property reports for NPB easements	June 30, 2024
monitoring and stewardship of ~ 28 NPB easements	June 30, 2024

Activity 2: Native Prairie Habitat Enhancement & Restoration

Activity Budget: \$889,552

Activity Description:

Restoration and enhancement activities will be completed on about 700 acres. Activities include seed collection, site preparation, planting, invasive species prevention and control, woody species removal, boundary signing, site cleanup, prescribed burns (or alternative prescribed disturbance, such as haying, mowing or grazing, where appropriate) and monitoring. All restorations will use seeds/plants of local ecotypes, collected from onsite or within 30 miles. Ecological Monitoring will occur at 35 NPB sites to collect ecological data in order to evaluate whether the objectives of management were met, to analyze ecological changes over time and to contribute to future management decisions. Restoration and enhancement activities will be carried out via landowner agreements, DNR staff, CCM, volunteers, and/or contractors.

Activity Milestones:

Description	Completion Date
~18 acres of prairie reconstruction (restoration)	June 30, 2024
~220 acres of woody removal & invasive species treatment	June 30, 2024
~ 462 acres of prescribed burns	June 30, 2024
NPB easement boundary signs & development work on ~3 NPB sites	June 30, 2024
Ecological monitoring on ~35 NPB sites	June 30, 2024

Activity 3: Acquisition and Stewardship of Native Prairie Bank Easements

Activity Budget: \$642,935

Activity Description:

DNR-administered permanent NPB conservation easements will be acquired on about 130 acres of high quality native prairie, which will include no more than 30% non-prairie as necessary to improve prairie management. Payment rates are determined by authorizing law, M.S. 84.96, as applied according to policies of the Department of Natural Resources and the Board of Water and Soils Resources. Conservation easement baseline reports will be completed on all approximately 3 NPBs acquired. Priority sites are identified by MBS which target rare and endangered plant and animal species, high quality plant communities, key habitats for Species in Greatest Conservation Need (SGCN) and parcels within larger habitat complexes to reduce impacts from habitat fragmentation. If needed, restoration will be completed using a combination of funds from Activity 2 above and/or other state appropriations. Only about 10 of the 130 acres acquired are expected to need restoration. Funding will be deposited into a conservation easement stewardship account dedicated to perpetual monitoring and enforcement on NPB easements acquired with this proposal.

Activity Milestones:

Description	Completion Date
Acquisition of about 130 acres NPB conservation easements	June 30, 2024
~3 baseline property reports for NPB easements	June 30, 2024
Dollars deposited into conservation easement stewardship account (~3 easements)	June 30, 2024

Project Partners and Collaborators

Name	Organization	Role	Receiving Funds
Minnesota Prairie Conservation Plan Partners and Local Technical Teams	Teams of staff from SWCD's, NRCS, DNR, USFWS, TNC, Pheasants Forever, etc.	Cultivate relationships with prairie landowners and bring new potential NPB parcels to DNR prairie staff for further evaluation.	No

Dissemination

Describe your plans for dissemination, presentation, documentation, or sharing of data, results, samples, physical collections, and other products and how they will follow ENRTF Acknowledgement Requirements and Guidelines.

Copies of Stewardship Plans are provided to local DNR managers and used by the landowner with other agencies and programs. Workshops and field days will be listed on the SNA Website, and advertised locally via mailings and flyer postings. U.S. mailings, social media, email, and newsletters will be created and distributed to prairie landowners as part of the Prairie Landowner Network. Acknowledgement of the ENRTF will be included in all project communications and outreach as laid out in the "ENRTF Acknowledgement Requirements and Guidelines" document.

Long-Term Implementation and Funding

Describe how the results will be implemented and how any ongoing effort will be funded. If not already addressed as part of the project, how will findings, results, and products developed be implemented after project completion? If additional work is needed, how will this be funded?

Currently, DNR holds 14,181 acres of NPB easements, which accounts for 40% of the MBS mapped native prairie protected through conservation easements statewide. If NPB aimed to protect 40% of the Minnesota Prairie Conservation Plan native prairie easement protection goals, NPB would need to acquire an additional 44,000 acres. At the same time, without active natural resource management prairie values will be lost. Thus Native Prairie Bank could utilize ENRTF support of about \$5M per year to sustain and protect native prairie.

Other ENRTF Appropriations Awarded in the Last Six Years

Name	Appropriation	Amount Awarded
Native Prairie Stewardship and Prairie Bank Easement Acquisition	M.L. 2015, Chp. 76, Sec. 2, Subd. 09d	\$3,325,000

Acquisition and Restoration

Parcel List

Name	County	Site Significance	Activity	Acres	Miles	Estimated Cost	Type of Landowner	Easement or Title Holder	Status of Work
Agassiz Dunes	Norman, Polk,	Dry barrens oak savanna-rare prairie plant community in northern MN	Conservation Easement	80	-	\$144,000	Private	DNR-SNA	Has not begun
Big Stone Lake Prairie (north & south)	Big Stone	Dry Hill, mesic and wet prairies along Big Stone Lake next to DNR state park and SNA parcels	Conservation Easement	40	-	\$72,000	Private	DNR-SNA	Has not begun
Big Stone Moraines	Big Stone	Prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat for many rare species	Conservation Easement	80	-	\$144,000	Private	DNR-SNA	Has not begun
Blanket Flower Prairies	Clay, Becker, Otter Tail,	Dry Sand-gravel prairie in Alexandria Moraine and Hardwood Hills subsection	Conservation Easement	100	-	\$150,000	Private	DNR-SNA	Has not begun
Blue Mounds/Touch-The-Sky Prairies	Rock	Mesic to wet prairie with rock outcrops; provides habitat for many rare rock outcrop plants	Conservation Easement	40	-	\$160,000	Private	DNR-SNA	Has not begun
Blue Stem Prairie	Clay	Mesic, wet meadow/carr, & wet prairie parcels intermixed with DNR SNA and Audobon preserves	Conservation Easement	80	-	\$144,000	Private	DNR-SNA	Has not begun
Chanarambie Creek Prairies	Murray, Pipestone,	Dry gravel, mesic & wet prairies in biggest grassland complex with the highest quality prairie parcels in SW MN	Conservation Easement	80	-	\$224,000	Private	DNR-SNA	Has not begun
Des Moines River Valley	Cottonwood, Jackson,	Des Moines River Valley native prairie including oak savanna, dry hill prairie; expands habitat for many, butterflies, birds and rare plants - including Prairie Bush Clover.	Conservation Easement	80	-	\$240,000	Private	DNR-SNA	Has not begun
Felton Prairies	Clay	Prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat for many rare species as well as Prairie Chickens	Conservation Easement	100	-	\$180,000	Private	DNR-SNA	Has not begun
Frontenac Hay Creek Bluffs	Goodhue	Southern dry bedrock bluff (goat) prairies in a complex of bluff prairies and cold streams	Conservation Easement	40	-	\$104,000	Private	DNR-SNA	Has not begun

Glacial Lakes & Moraine Prairie	Pope, Kandiyohi, Swift, Stearns,	Dry sand-gravel prairies of the Alexandria Moraine, provides habitat for the Threatened Dakota Skipper as well as the Poweshiek Skipper and Regal Fritillary	Conservation Easement	150	-	\$375,000	Private	DNR-SNA	Has not begun
Glacial Ridge Prairies	Polk	Prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat for many rare species as well as Prairie Chickens	Conservation Easement	160	-	\$256,000	Private	DNR-SNA	Has not begun
Hole-in-the-Mountain Prairies	Lincoln, Pipestone,	Dry hill prairie, prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat around existing TNC and DNR lands	Conservation Easement	150	-	\$390,000	Private	DNR-SNA	Has not begun
Kellogg-Weaver Dunes Prairies	Winona, Wabasha,	Rolling sand dune topography, mature dunes with dry, mesic, or wet prairie as well as oak savanna	Conservation Easement	40	-	\$100,000	Private	DNR-SNA	Has not begun
Lake Bronson and Aspen Parkland Prairies	Kittson, Marshall, Roseau,	Aspen parkland complex-many prairie dominated aspen complexes are succeeding to woodland in absence of fire	Conservation Easement	200	-	\$200,000	Private	DNR-SNA	Has not begun
Lake Christina Hills Prairies	Douglas, Grant, Otter Tail,	Dry Hill to wet prairies; part of the rolling topography of the Alexandria moraine	Conservation Easement	80	-	\$144,000	Private	DNR-SNA	Has not begun
Lake Traverse Prairies	Traverse	Dry prairie and prairie- woodland complex	Conservation Easement	150	-	\$300,000	Private	DNR-SNA	Has not begun
Prairie Coteau/Rock River Prairies	Pipestone	Dry hill prairie, prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat around the Prairie Coteau SNA	Conservation Easement	150	-	\$2,500	Private	DNR-SNA	Has not begun
Root River Valley Prairies	Houston, Fillmore, Winona,	Southern Dry Bedrock Bluff (goat) prairies in a complex of bluff prairies and cold streams; habitat for timber rattlesnakes	Conservation Easement	40	-	\$96,000	Private	DNR-SNA	Has not begun
Rothsay Prairies	Wilkin	Prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat for many rare species as well as Prairie Chickens	Conservation Easement	160	-	\$256,000	Private	DNR-SNA	Has not begun

Shakotan Prairies	Lincoln	Dry hill prairie, prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite	Conservation Easement	150	-	\$390,000	Private	DNR-SNA	Has not begun
Sherburne Sands Prairies	Sherburne	A mosaic of prairie, wetlands and oak savanna set in an important transition zone	Conservation Easement	80	-	\$128,000	Private	DNR-SNA	Has not begun
Upper MN River Prairies	Chippewa, Redwood, Renville, Yellow Medicine, Swift,	MN River Valley native prairie including oak savanna, wet prairie, rock outcrops; expands habitat for many rare plants, butterflies and birds	Conservation Easement	200	-	\$580,000	Private	DNR-SNA	Has not begun
Wambach Santee Prairie	Mahnomen	Prairie meadow complexes, prairie rich fens and other rare northern plant communities	Conservation Easement	150	-	\$150,000	Private	DNR-SNA	Has not begun
Yellow Medicine Coteau Prairie	Yellow Medicine	Dry hill prairie, prairie meadow, wet prairie, rare species; part of a large, contiguous prairie macrosite, expands habitat for Western White Prairie Clover and Upland Sandpiper	Conservation Easement	160	-	\$400,000	Private	DNR-SNA	Has not begun

Conservation Easement Acquisition

1. Describe the selection process for identifying and including proposed parcels on the parcel list, including an explanation of the criteria and decision-making process used to rank and prioritize parcels.

Eligibility for Native Prairie Bank (NPB) is established in both M.S. 84.96 and MN Rule 6136.09. To qualify, land must be covered by native prairie vegetation and have never been plowed. Eligible lands are prioritized based on factors including: size, quality and diversity of the native prairie habitat; occurrence of, or suitable habitat for rare species; location relative to other native prairie and/or public land; and potential for long-term habitat management and enhancement. MBS data is the foundation for many of these evaluation factors. Native Prairie Bank uses the “Native Prairie Bank Evaluation Form” to evaluate and score individual projects. This form has been included as an attachment to this proposal for reference.

2. List all adopted state, regional, or local natural resource plans in which the lands included in the parcel list are identified for the acquisition purposes you propose. Include the URL to the plan if one is available.

Minnesota Prairie Conservation Plan (<https://www.dnr.state.mn.us/prairieplan/index.html>)

Minnesota's Wildlife Action Plan 2015-2025 (<https://www.dnr.state.mn.us/mnwap/index.html>)

Minnesota DNR Strategic Conservation Agenda (<https://www.dnr.state.mn.us/conservationagenda/index.html>)

Statewide Conservation and Preservation Plan (https://www.lccmr.leg.mn/documents/scpp/statewide_plan.htm)

3. For any conservation easement acquired, a restoration and management plan must be prepared. Summarize the components and expected outcomes of restoration and management plans for parcels acquired by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation, including how long-term maintenance and management needs of the parcel will be financed into the future.

Each parcel acquired as a new NPB will have a Prairie Stewardship Plan. Prairie Stewardship Plans include, 1) a resource inventory and assessment of all the lands native plant communities or restored to plant communities that would have been native to the site, 2) landowner and DNR's goals, and 3) prairie management alternatives/recommendations. The goals for the NPB's management are based upon soils, topography, geology, and other factors necessary to sustain the plant community. Each plan includes an implementation timetable that summarizes ongoing management needs and a statement on funding. Long-term management costs (e.g. invasive species treatments, prescribed fire, and ecological monitoring/evaluation) will be covered by a combination of funding sources, including, but not limited to, the landowner, ENRTF, Outdoor Heritage Fund (OHF), federal grants, and other funds as appropriated. Each Prairie Stewardship Plan is kept in a DNR internal shared electronic filing system accessible to all SNA staff along with a copy given to the landowner.

4. For each parcel to be conveyed to a State of Minnesota entity (e.g., DNR) after purchase, provide a statement confirming that county board approval will be obtained.

DNR policy is to notify the county assessor prior to easement closing, however county board approval is not requested.

5. If applicable (see M.S. 116P.17), provide a statement confirming that written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

As part of the DNR acquisition process, all NPB acquisitions are required to have approval of the Ecological and Water Resources Division Director and land conveyances are accepted by the Director or Deputy Director of the Division of Lands and Minerals who have delegated authority to approve this for the Commissioner.

6. Provide a statement addressing how conservation easements will address specific water quality protection activities, such as keeping water on the landscape, reducing nutrient and contaminant loading, protecting groundwater, and not permitting artificial hydrological modifications.

Native Prairie Bank's goal is to protect existing high quality, high functioning native prairie that currently is providing multiple water quality benefits. In addition, the easement terms and the Prairie Stewardship Plan they are required to follow assures that the prairie health is sustained, thus they inherently do an excellent job of keeping the water on the

landscape, reducing nutrient and contaminant loading, and protecting groundwater. In addition, use of pesticides on the easement is prohibited without approval of the DNR. The easement terms also prohibit artificial hydrological modifications by prohibiting excavation, cultivations, drainage, filling, and irrigation.

7. Describe the long-term monitoring and enforcement program for conservation easements acquired on parcels by your organization, including explanations of the process used for calculating conservation easement monitoring and enforcement costs, the process used for annual inspection and reporting on monitoring and enforcement activities, and the process used to ensure perpetual funding and implementation of monitoring and enforcement activities.

The policy of the DNR is to protect both the conservation values of the property protected by these easements and the investment of the state in those interests. Elements of this stewardship include the creation of baseline property reports, enforcement protocols, regular compliance monitoring, record keeping and reporting, and maintaining effective working relationships with the owners of these easement properties. Native Prairie Bank implements this policy by following DNR Operational Order #128 “Conservation Easement Stewardship” in addition to the “Ecological and Water Resources Division Conservation Easement Stewardship Plan and Guidelines”. This operational order and supporting division guidance calls for annual landowner contacts as well as on-the-ground site evaluations once every three years if no violations are found. If a violation is found, monitoring would occur annually until the violation is corrected.

Budgeted into this work plan is funding to be deposited into the DNR’s Conservation Easement Stewardship Account dedicated to the perpetual monitoring and enforcement of conservation easements. The dedicated stewardship funds will provide the support needed for long-term, ongoing monitoring and minor enforcement activities of Native Prairie Bank easements acquired under this proposal. For each specific Native Prairie Bank easement, initial investment dollars are determined by using a DNR approved Conservation Easement Stewardship Calculator, which estimates the annual expenses and the investment needed to generate annual income sufficient to cover these expenses in perpetuity.

Funds for this activity will be deposited into the established conservation easement stewardship account and Minnesota Management & Budget protocols will be adhered to. After the closing of each Native Prairie Bank easement acquired with this appropriation, the calculated easement stewardship funds will be deposited into this account. Once funds are deposited and interest begins to accrue, this accrued interest will be applied towards actual expenses tied to annual landowner contact, regular compliance monitoring, record keeping and minor enforcement protocols.

Restoration

1. Provide a statement confirming that all restoration activities completed with these funds will occur on land permanently protected by a conservation easement or public ownership.

All restoration activities done with this appropriation are on DNR-owned perpetual Native Prairie Bank conservation easements administered by the SNA Program.

2. Summarize the components and expected outcomes of restoration and management plans for the parcels to be restored by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation.

Each restoration project will be based upon a Native Prairie Stewardship Plan (ecological restoration and management plan) and/or project plan with goals for reconstructing plant communities that are native to the site that are based upon soils, topography, geology, and other factors necessary to sustain the plant community. Each plan includes an implementation timetable which summarizes ongoing management needs. Each restoration and management plan and project plan is kept by the landowner and in a DNR internal shared electronic filing system accessible to all SNA staff.

3. Describe how restoration efforts will utilize and follow the Board of Soil and Water Resources “Native Vegetation Establishment and Enhancement Guidelines” in order to ensure ecological integrity and pollinator enhancement.

The SNA Program follows or exceeds the recommendations found in the BWSR “Native Vegetation Establishment and Enhancement Guidelines”. NPB restorations typically follow the current BWSR Guidelines, including Project Guidance,

Plant Community Restoration, and Temporary Cover. The SNA Program follows the general direction of the BWSR Guidelines for “Recommended Steps for Obtaining Plant Materials”, and has additional and more restrictive requirements for restoration material sources. Specifically, all restorations on Native Prairie Banks use seeds/plants of local ecotypes, collected from onsite or within 30 miles. Restoration and management of DNR lands are governed by DNR Operational Order #124 on “Plant Material Standards for Native Plant Community Restoration” and DNR Operational Order #130 on “Pollinator Habitat” (which include BMPs).

4. Describe how the long-term maintenance and management needs of the parcel being restored with these funds will be met and financed into the future.

Long-term management costs (e.g. invasive species treatments, prescribed fire, and monitoring/evaluation) will be covered by a combination funding sources, including, but not limited to, the landowner, ENRTF, Outdoor Heritage Fund (OHF), federal grants, and other funds as appropriated.

5. Describe how consideration will be given to contracting with Conservation Corps of Minnesota for any restoration activities.

DNR has a standing general contract with CCMI under which the SNA Program often does project or activity specific agreements. For restoration projects, CCMI has been and will continue to be used when appropriate for hand seed harvest, invasive species control and prescribed burning on NPBs.

6. Provide a statement indicating that evaluations will be completed on parcels where activities were implemented both 1) initially after activity completion and 2) three years later as a follow-up. Evaluations should analyze improvements to the parcel and whether goals have been met, identify any problems with the implementation, and identify any findings that can be used to improve implementation of future restoration efforts at the site or elsewhere.

Restoration projects will be evaluated and a report submitted to the LCCMR to ascertain how well the native plants have been established and non-natives controlled. The evaluation reports include a summary of management plan outcomes, activities completed through the project, map of the project area, a statement of ongoing management needs and funding, and a summary of the evaluation.

Difference between Proposal and Work Plan

Describe changes from Proposal to Work Plan Stage

Below is a summary of changes made:

- 1.) Updated project summary to remove reference to resubmission. I assume the ML21 resubmission of the ML20 proposal was used to create this electronic workplan and since we are reverting back to original ML20 submission I figured it was best to remove that reference.
- 2.) Requested different reporting dates (1 month earlier) to stay consistent with previous appropriations received.
- 3.) Updated acres currently protected through Native Prairie Bank since several parcels have been added to the program since the original submission of this proposal.
- 4.) Added dissemination efforts.

Additional Acknowledgements and Conditions:

The following are acknowledgements and conditions beyond those already included in the above workplan:

Do you understand and acknowledge the ENRTF repayment requirements if the use of capital equipment changes?

N/A

Do you agree travel expenses must follow the "Commissioner's Plan" promulgated by the Commissioner of Management of Budget or, for University of Minnesota projects, the University of Minnesota plan?

Yes, I agree to the Commissioner's Plan.

Does your project have potential for royalties, copyrights, patents, or sale of products and assets?

No

Do you understand and acknowledge IP and revenue-return and sharing requirements in 116P.10?

N/A

Do you wish to request reinvestment of any revenues into your project instead of returning revenue to the ENRTF?

N/A

Does your project include original, hypothesis-driven research?

No

Does the organization have a fiscal agent for this project?

No
