

Environment and Natural Resources Trust Fund

M.L. 2020 Approved Work Plan

General Information

ID Number: 2020-065

Staff Lead: Michael Varien

Date this document submitted to LCCMR: August 13, 2021

Project Title: Turning Back To Rivers: Environmental And Recreational Protection

Project Budget: \$1,000,000

Project Manager Information

Name: DJ Forbes

Organization: The Trust for Public Land

Office Telephone: (651) 999-5325

Email: dj.forbes@tpl.org

Web Address: <https://www.tpl.org/>

Project Reporting

Date Work Plan Approved by LCCMR: August 13, 2021

Reporting Schedule: April 1 / October 1 of each year.

Project Completion: June 30, 2024

Final Report Due Date: August 14, 2024

Legal Information

Legal Citation: M.L. 2021, First Special Session, Chp. 6, Art. 5, Sec. 2, Subd. 09g

Appropriation Language: \$1,000,000 the second year is from the trust fund to the commissioner of natural resources for an agreement with The Trust for Public Land to help local communities acquire priority land along the Mississippi, St. Croix, and Minnesota Rivers and their tributaries to protect natural resources, provide buffers for flooding, and improve access for recreation.

Appropriation End Date: June 30, 2024

Narrative

Project Summary: This project will help communities acquire priority land along the Mississippi, St. Croix, and Minnesota Rivers, and their tributaries, protecting the environment and water quality while creating much-needed recreational opportunities.

Describe the opportunity or problem your proposal seeks to address. Include any relevant background information.

Thousands of Minnesotans live within mere miles of the state's iconic Mississippi, St. Croix, and Minnesota Rivers, and their major tributaries, and cannot access and enjoy the rivers or the land adjacent to them. In the Land of 10,000 Lakes, our rivers are under-valued and increasingly inaccessible natural assets. Historically, these rivers have been predominately used for industry and commerce, and then dumping and waste. Communities viewed these natural amenities as opportunities for commercial development rather than spaces for the public to enjoy. Reality has thankfully shifted. Communities throughout the state now understand the environmental and recreational benefits their rivers offer as nearby natural assets ripe for protection and public enjoyment. Communities are eager to partner to protect these dynamic riverside assets.

These communities have created plans and identified and prioritized opportunities for the protection of public open space, but they lack funding, capacity, and the real estate know-how to effectively achieve their goals. TPL brings expertise in complex real estate transactions, and we have the proficiencies needed to help communities efficiently solve their specific natural resource needs.

What is your proposed solution to the problem or opportunity discussed above? i.e. What are you seeking funding to do? You will be asked to expand on this in Activities and Milestones.

Working hand in hand with river communities, The Trust for Public Land (TPL) will protect land through fee title acquisition and increase access on and near Minnesota's great rivers. Our partnership is based on existing local area plans and we will protect approximately 100 acres of high priority, high quality natural resource land: lands with high recreational value, lands that address access gaps, lands that maximize scenic and habitat benefits, and lands that help to protect from high water and flooding.

By permanently protecting these lands, multiple benefits are achieved:

- Protection of high quality natural resource land for community enjoyment, wildlife habitat, and water quality
- Resilience due to improved ecosystem connectivity of native animal and plant populations (including "Species in Greatest Conservation Need") in the face of climate change and invasive species
- Increased access to various outdoor recreation opportunities along Minnesota's rivers, improving the connection between people and Minnesota's natural resources
- Additional buffers from high water and flooding

Protecting these parcels for resource based recreational needs, addressing access gaps areas, and inspiring river-oriented communities is a demand that can be uniquely met by ENRTF/LCCMR funding.

What are the specific project outcomes as they relate to the public purpose of protection, conservation, preservation, and enhancement of the state's natural resources?

In partnership with local and county government, we will protect approximately 100 acres through fee title acquisition of high priority, high quality natural resource land. These properties have been prioritized in state, regional, and local natural resource and recreation plans, reflecting strong community support. Our efforts will focus on river communities throughout the state by protecting land that they are excited to manage and that will provide multiple outdoor recreational opportunities. These lands are not eligible for other protection funding due in large part to hunting requirements.

Project Location

Statewide

What is the best scale to describe the area impacted by your work?

Statewide

When will the work impact occur?

During the Project and In the Future

Activities and Milestones

Activity 1: Protect Strategic Lands: Fee-title acquisition of high priority lands along the Mississippi, St. Croix, and Minnesota Rivers, and their tributaries

Activity Budget: \$1,000,000

Activity Description:

Eligible parcels (see attached acquisition parcel list) have been identified by communities in local plans as priorities for recreational value, high quality natural resources, lands that address access gaps, scenic qualities, and/or water protection. Not all parcels can be protected at the same time. Prioritization factors include adjacency to already protected land; landowner willingness to sell for conservation purposes; final local decision making on protection; and other due diligence. TPL will conduct all due diligence activities including appraisals, environmental reviews, title investigations, and survey work. Acquired land will be conveyed to our public agency partner (local units of government or MN DNR) for long-term stewardship, maintenance, and if called for, park and trail development. An example is:

- Cottage Grove Kiln/Mississippi River: Adjacent to city-owned Settlers Island, Urmann Ries site, and Moores Park, the acquisition of this parcel would add to the river access trail vision planned by the National Park Service and the City of Cottage Grove. This site will provide community access to the river for educational and recreational opportunities, and includes the historic Grey Cloud Lime Kiln, which is on the National Register of Historic Places. This is a high priority for Cottage Grove.

Activity Milestones:

Description	Completion Date
Investigate potential projects, and negotiate with landowners	June 30, 2022
Complete due diligence, and reach agreement with permanent steward to accept land	June 30, 2023
Acquire land, convey to permanent steward, and land is open to public	June 30, 2024
Work with permanent steward on initial site development/restoration	June 30, 2024

Dissemination

Describe your plans for dissemination, presentation, documentation, or sharing of data, results, samples, physical collections, and other products and how they will follow ENRTF Acknowledgement Requirements and Guidelines.

The Minnesota Environment and Natural Resources Trust Fund (ENRTF) will be acknowledged through use of the trust fund logo or attribution language on project print and electronic media, publications, signage, and other communications per the ENRTF Acknowledgement Guidelines. Once the land is acquired and has been conveyed to the permanent steward, we will share the success of the land protection project through various methods to let people know this land is now publically accessible. Methods include, but are not limited too; creating a specific project page on The Trust for Public Land website, drafting and sharing a press release, and coordinating with the permanent steward on additional outreach opportunities.

Long-Term Implementation and Funding

Describe how the results will be implemented and how any ongoing effort will be funded. If not already addressed as part of the project, how will findings, results, and products developed be implemented after project completion? If additional work is needed, how will this be funded?

Strengthening the connection between land and people is vital in ensuring the long-term stewardship of Minnesota's natural resources. We view this proposal as a long-term strategy, and will continue its work as long as critical habitat and natural resources based recreation opportunities remain unprotected and in danger of degradation and loss. Land protection is not the final step in helping communities turn back to rivers; however, it is a critical step needed before long-term restoration, stewardship, and programming of these riverfront areas can take place. These activities will be led and funded by the long-term steward of the resource.

Other ENRTF Appropriations Awarded in the Last Six Years

Name	Appropriation	Amount Awarded
Metro Conservation Corridors Phase VIII - Strategic Lands Protection	M.L. 2015, Chp. 76, Sec. 2, Subd. 09f	\$750,000

Acquisition and Restoration

Parcel List

Name	County	Site Significance	Activity	Acres	Miles	Estimated Cost	Type of Landowner	Easement or Title Holder	Status of Work
Brainerd/Mississippi River	Crow Wing	Located within the heart of Brainerd, acquisition of these parcels would allow the City to create a park and access the river.	Fee Title	3.2	0.1	\$254,000	Private	City of Brainerd	Has not begun
Byllesby Park/Cannon River	Goodhue	Located between the main park area and the upper park area, acquisition of these parcels would provide additional riverside protection and access, and nearly double the size of this unique recreational area located on the Cannon River at Lake Byllesby. This is a high priority for Goodhue County.	Fee Title	117	1	\$600,000	Private	Goodhue County	Has not begun
Caron Park/Prairie Creek	Rice	Located along Prairie Creek and abutting Caron Park, the acquisition of these parcels will provide additional acreage and access to this important Rice County park.	Fee Title	70	0.1	\$400,000	Private	Rice County	Has not begun
Chippewa County/Minnesota River	Chippewa	Increases access to Minnesota River, adjacent to County Property.	Fee Title	40	1	\$140,000	Private	Chippewa County or MN DNR	Has not begun
Cottage Grove Kiln/Mississippi River	Washington	Adjacent to city-owned Settlers Island, Urmann Ries site, and Moores Park, the acquisition of this parcel would add to the river access trail vision planned by the National Park Service and the City of Cottage Grove. This site is proposed to provide community access to the river for educational and recreational opportunities, and includes the historic Grey Cloud Lime Kiln, which is on the National Register of Historic Places. This is a high priority for Cottage Grove.	Fee Title	7.4	0.2	\$320,000	Private	City of Cottage Grove	Has not begun
Nielson Memorial Preserve/Zumbro River	Goodhue	Directly abutting the recently created Nielson Memorial Preserve, the protection of these parcels will provide	Fee Title	105	0	\$450,000	Private	Goodhue County	Has not begun

		access and additional acreage for this Big Woods refuge located on the North Fork of the Zumbro River.							
Point Douglas/St. Croix River	Washington	Located on the St. Croix River between Carpenter Nature Center to the north and Point Douglas County Park to the south, the acquisition of this parcel would provide fee-title to a trail corridor (addition to St. Croix Valley Regional Trail) and would preserve remnants of mesic oak forest and additional riparian and upland habitat for a variety of wildlife and bird species of greatest conservation need.	Fee Title	41	0.5	\$835,900	Private	Washington County	Has not begun
St. Cloud/Mississippi River	Stearns	Directly abutting the Mississippi River and River Bluffs Regional Park within the City of St. Cloud, these four parcels provide an opportunity for residents to directly access the river.	Fee Title	133	0.75	\$766,000	Private	City of St. Cloud or Stearns County	Has not begun
Timms Creek/Minnesota River	Renville	Identified in the Minnesota River Valley Recreation and Conservation Master Plan, the protection of these parcels will conserve unique and sensitive natural resources while providing increased recreational opportunities.	Fee Title	190	0.75	\$1,000,000	Private	Renville County or MN DNR	Has not begun
Totals				706.6	4.4	\$4,765,900			

Fee Acquisition

1. Describe the selection process for identifying and including proposed parcels on the parcel list, including an explanation of the criteria and decision-making process used to rank and prioritize parcels.

The proposed parcels have been identified and prioritized in state, regional and local natural resource and recreation plans, as well as through agency and community conversations. These parcels are regarded as priorities for recreational value, high quality natural resources, land that address access gaps, scenic value, and/or water protection. Other prioritization factors are presence of biodiversity significance on site, adjacency to already protected land, level of local support, immediacy of threats, whether we see a pathway to obtain full funding to successfully compete the acquisition, whether the permanent steward will be able to adequately manage the property and fund on-going maintenance, and landowner willingness and timing needs.

2. List all adopted state, regional, or local natural resource plans in which the lands included in the parcel list are identified for the acquisition purposes you propose. Include the URL to the plan if one is available.

The parcels included in our proposal have been identified through state, county, and local plans as being priorities – plans include:

- o Minnesota Scientific and Natural Areas Program Strategic Land Protection Plan
- o Minnesota DNR Strategic Conservation Agenda: 2015-2025
- o MN State Comprehensive Outdoor Recreation Plan 2014-2018
- o Washington County's Land and Water Legacy Program
- o Mississippi River Partnership Plan for the City of Brainerd
- o Minnesota Great River Road Corridor Management Plan
- o LCCMR – Six-Year Strategic Plan for MN's Environment and Natural Resources Trust Fund
- o Goodhue County Byllesby Park Master Plan
- o Goodhue County Nielsen Memorial Preserve Master Plan
- o Minnesota River Valley Recreation and Conservation Master Plan

3. For any parcels acquired in fee title, a restoration and management plan must be prepared. Summarize the components and expected outcomes of restoration and management plans for parcels acquired by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation, including how long-term maintenance and management needs of the parcel will be financed into the future.

Once parcels have been acquired and conveyed to the long-term steward, initial site development and restoration of the property will begin. The Trust for Public Land will work with the long-term steward to complete a restoration and management plan (including how these activities will be funded), and implementation of that plan will be completed in the years following acquisition. Estimated costs for initial development costs of parcels are included in this proposal.

4. For each parcel to be conveyed to a State of Minnesota entity (e.g., DNR) after purchase, provide a statement confirming that county board approval will be obtained.

The Trust for Public Land will work with local units of government on the acquisition of these parcels. If required, County Board approval will be obtained.

5. If applicable (see M.S. 116P.17), provide a statement confirming that written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

Written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

Difference between Proposal and Work Plan

Describe changes from Proposal to Work Plan Stage

Addressed LCCMR staff comments.

Additional Acknowledgements and Conditions:

The following are acknowledgements and conditions beyond those already included in the above workplan:

Do you understand and acknowledge the ENRTF repayment requirements if the use of capital equipment changes?

N/A

Do you agree travel expenses must follow the "Commissioner's Plan" promulgated by the Commissioner of Management of Budget or, for University of Minnesota projects, the University of Minnesota plan?

N/A

Does your project have potential for royalties, copyrights, patents, or sale of products and assets?

No

Do you understand and acknowledge IP and revenue-return and sharing requirements in 116P.10?

N/A

Do you wish to request reinvestment of any revenues into your project instead of returning revenue to the ENRTF?

N/A

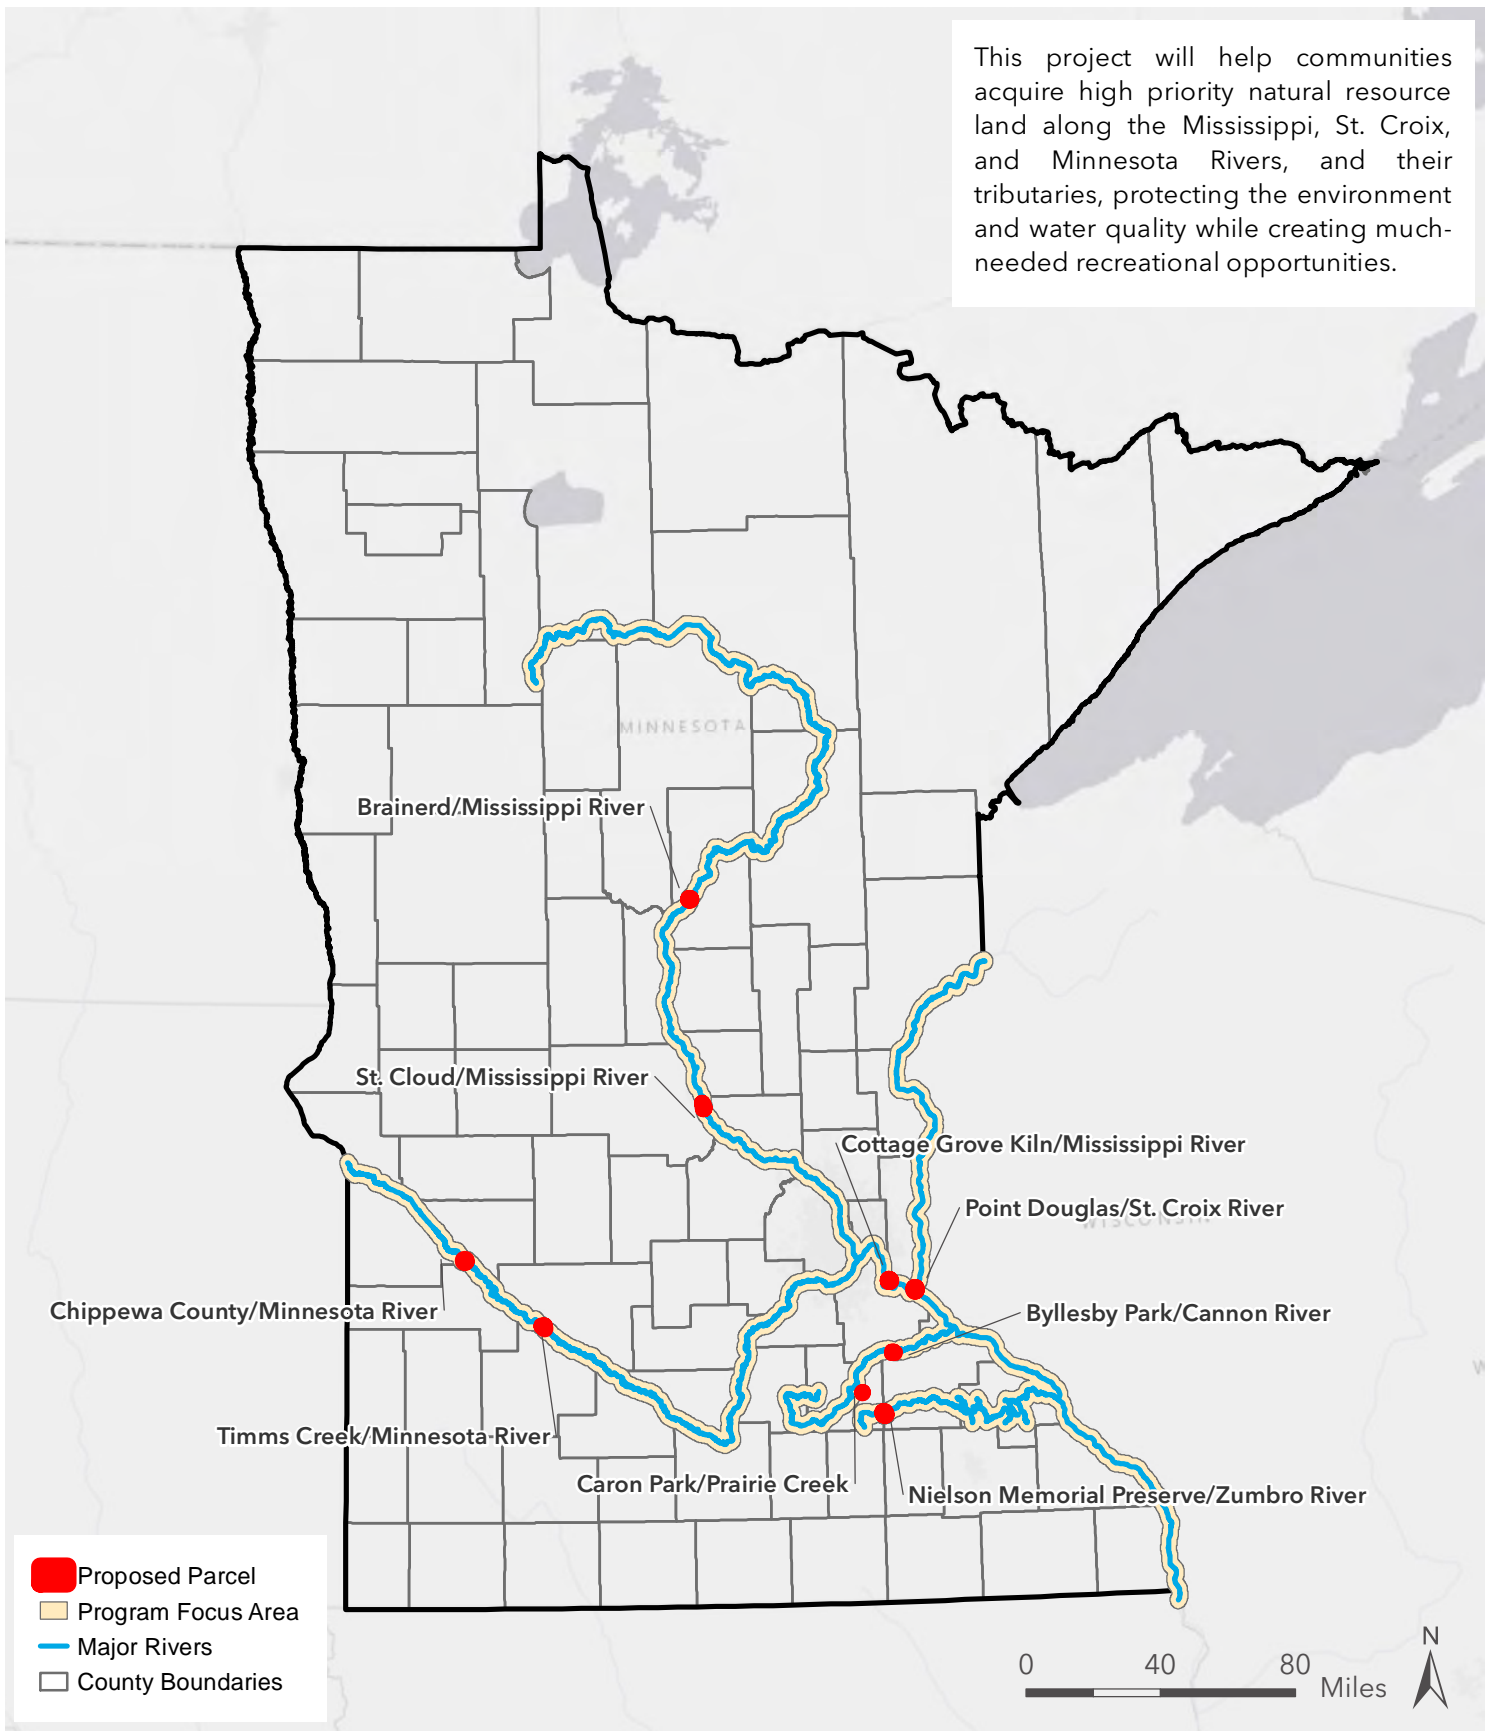

Does your project include original, hypothesis-driven research?

No

Does the organization have a fiscal agent for this project?

No

This project will help communities acquire high priority natural resource land along the Mississippi, St. Croix, and Minnesota Rivers, and their tributaries, protecting the environment and water quality while creating much-needed recreational opportunities.
