M.L. 2020 ENRTF Work Plan

Today's Date: August 15, 2019

Date of Next Status Update Report: April 1, 2021

Date of Work Plan Approval:

Project Completion Date: June 30, 2023

Does this submission include an amendment request? __

PROJECT TITLE: DNR Scientific and Natural Areas

Project Manager: Molly Roske

Organization: Minnesota Department of Natural Resources

College, Department, or Division: Division of Ecological & Water Resources

Mailing Address: 500 Lafayette Road, Box 25

City, State, Zip Code: St Paul, MN 55155-4025

Project Manager Direct Telephone Number: (651) 259-5094

Email Address: Molly.Roske@state.mn.us

Web Address: mndnr.gov/snas

Location: Statewide

Total Project Budget: \$3,000,000

Amount Spent: \$0

Balance: \$3,000,000

Legal Citation: M.L. 2020, Chp. xx, Sec. xx, Subd. xx

Appropriation Language:

PROJECT STATEMENT:

The unique and vital role of state Scientific and Natural Areas (SNAs) will be increased through wildlife habitat restoration and enhancement, increased public involvement, and strategic acquisition. About 580 acres of native habitat restoration, enhancement, and site improvement activities will be targeted at SNAs threatened by invasive species and lack of natural disturbance regimes and to provide nature-based recreation. In cooperation with Conservation Corp of Minnesota (CCM), outreach and citizen science actions will result in public participation at 45 SNA events and a network of volunteer site stewards at 130 SNAs. About 250 acres will be strategically acquired from willing sellers and designated as SNAs to protect at risk native plant communities and wildlife habitat of state significance identified by the Minnesota Biological Survey (MBS) and the SNA Strategic Land Protection Plan.

II. OVERALL PROJECT STATUS UPDATES:

First Update April 1, 2021

Second Update October 1, 2021

Third Update April 1, 2022

Fourth Update October 1, 2022

Fifth Update April 1, 2022

Sixth Update October 1, 2022

Seventh Update April 1, 2023

Final Report between project end (June 30) and August 15, 2023

III. PROJECT ACTIVITIES AND OUTCOMES:

ACTIVITY 1 Title: Native Habitat Restoration, Enhancements and Improvements

Description: Native habitat restoration and site improvement activities will be completed on about 580 acres at about 25 SNAs. Management plans will be completed for about 4 SNAs (including sites acquired through these funds). About 30 SNAs will be monitored to improve management and track changes to rare species, imperiled plant communities and other important protected features. SNA staff will provide ecological/technical guidance and on-site verification for 3 projects implemented by partners on SNAs. Restoration and improvement activities will be carried out by DNR staff, CCM,

Sentence to Service, volunteers, and/or contractors. Activities include seed collection, site preparation, planting and aftercare, invasive species early detection, control and removal, site clean-up, signing, interpretive kiosks, fencing, and prescribed burns (or alternative prescribed disturbance, such as prescribed haying, mowing or grazing, necessary where use of fire is limited). This activity includes work to bring acquired parcels up to DNR’s minimum standards and includes restoration and improvements of acquired sites if ecologically advisable and feasible within the appropriation period.

ACTIVITY 1 ENRTF BUDGET: \$849,749

Outcome	Completion Date
1a. ~10 acres of restoration of forest, prairie, & outcrop sites	06/30/2023
1b. ~170 acres of woody removal & invasive species treatment	06/30/2023
1c. ~400 acres of prescribed burns	06/30/2023
1d. ~1 SNA interpretive kiosk installed AND development work on ~16 sites	06/30/2023
1e. ecological/technical guidance for ~3 partnership projects	06/30/2023
1f. management plans completed for ~4 SNAs	06/30/2023
1g. adaptive management, ecological & conservation easement monitoring on ~30 SNAs	06/30/2023

First Update April 1, 2021

Second Update October 1, 2021

Third Update April 1, 2022

Fourth Update October 1, 2022

Fifth Update April 1, 2022

Sixth Update October 1, 2022

Seventh Update April 1, 2023

Final Report between project end (June 30) and August 15, 2023

ACTIVITY 2 Title: Public Engagement, Outreach & Citizen Science in Natural Areas

Description: Minnesotans will be involved in volunteer habitat conservation and education activities on SNAs and in the conservation of other key natural areas. A network of 130 SNA volunteer site stewards who help care for SNAs will be sustained and 45+ events organized and executed (volunteer work days, recreation-educational events, guided nature hikes, citizen science monitoring, bio-blitzes, etc.). New and refined electronic/social media communications tools, maps and interpretive information will be developed and disseminated to advance the public’s understanding of Minnesota’s wild places and biodiversity and to enhance nature-based recreational use of SNAs. Natural Area Registry partnership promotion to increase conservation of natural areas owned by others.

Minnesota has an opportunity to co-host the 2021 Natural Areas Conference in Duluth. If held in Minnesota, this traveling national conference would bring natural resource professionals from across the nation and globe to Minnesota to share new research, evaluate best management practices and develop on-going connections. The Natural Areas Association (NAA), a national, non-profit dedicated to the support and advancement of the community of natural areas practitioners, would be the fiscal agent and coordinate all logistical needs (DNR would not generate any income). This appropriation allows SNA to provide and present expertise on Minnesota’s natural areas and resources to the NAA and conference attendees.

ACTIVITY 2 ENRTF BUDGET: \$439,822

Outcome	Completion Date
2a. SNA website, e-book, social media, maps & other interpretive info	06/30/2023
2b. ~ 45 citizen science & volunteer events (management work days & ed. events)	06/30/2023
2c. network of volunteer site stewards at ~130 SNAs	06/30/2023
2d. SNA sites and rare features highlighted at 2021 Natural Areas Conference through field trips, presentations and displays	06/30/2023

First Update April 1, 2021

Second Update October 1, 2021

Third Update April 1, 2022

Fourth Update October 1, 2022

Fifth Update April 1, 2022

Sixth Update October 1, 2022

Seventh Update April 1, 2023

Final Report between project end (June 30) and August 15, 2023

ACTIVITY 3 Title: Strategic Acquisition of Sites with Biodiversity Significance

Description: Acquisition and designation of ~250 acres as state SNAs will protect and buffer the most important MBS sites of biodiversity significance. Proactive landowner contacts will target SNA Strategic Plan priority areas, including MN Prairie Conservation Plan priority areas. Acquired sites must be recommended through an Ecological Evaluation report and numerically evaluated to ensure prioritization of MBS biodiversity significance sites that are predominantly MBS native plant communities with habitat for rare, threatened and endangered species and Species in Greatest Conservation Need. Most acquisition will be of fee title, but if more appropriate, acquisition could be a SNA-administered conservation easement with SNA designation. Included on the parcel list, are specific sites currently protected via permanent conservation easements that fall into SNA’s Strategic Plan. The rare features and unique plant communities on these sites would benefit from the protection and management provided by SNA and would add great value to SNA goals and mission. If acquired, an appraisal would be used to find the fair market value including current encumbrances such as conservation easements. New MBS/other scientific data will be incorporated into the SNA Strategic Plan to refine and increase strategic prioritization.

ACTIVITY 3 ENRTF BUDGET: \$1,710,429

Outcome	Completion Date
3a. acquisition as SNA of ~250 acres of high quality habitat	06/30/2023

First Update April 1, 2021

Second Update October 1, 2021

Third Update April 1, 2022

Fourth Update October 1, 2022

Fifth Update April 1, 2022

Sixth Update October 1, 2022

Seventh Update April 1, 2023

Final Report between project end (June 30) and August 15, 2023

IV. DISSEMINATION:

Description: Dissemination will primarily be achieved through the SNA webpage on the DNR website: mndnr.gov/snas, through the SNA Facebook page, and through Nature Notes – the SNA Program e-newsletter distributed through GovDelivery.com to subscribers and possibly through Tweets on the DNR Twitter site. Specifically, the DNR website will be updated with information on the new or expanded SNAs. Announcements of the acquisitions and some enhancement-related activities will be posted on the SNA/DNR Facebook page.

The Minnesota Environment and Natural Resources Trust Fund (ENRTF) will be acknowledged through use of the trust fund logo or attribution language on project print and electronic media, publications, signage, and other communications per the [ENRTF Acknowledgement Guidelines](#).

First Update April 1, 2021

Second Update October 1, 2021

Third Update April 1, 2022

Fourth Update October 1, 2022

Fifth Update April 1, 2022

Sixth Update October 1, 2022

Seventh Update April 1, 2023

V. ADDITIONAL BUDGET INFORMATION:

A. Personnel and Capital Expenditures

Explanation of Capital Expenditures Greater Than \$5,000: N/A

Explanation of Use of Classified Staff:

Consistent with approved work plans for previous ENRTF appropriations for the SNA Program, this funding will be used to pay project-associated costs for classified and unclassified staff paid mostly with special project funds. These positions would not exist, but for special project funding received through the ENRTF and other funds. Each year these positions are assigned work based on the particular combination of soft funding available to address priority SNA Program activities.

Total Number of Full-time Equivalents (FTE) Directly Funded with this ENRTF Appropriation:

Enter Total Estimated Personnel Hours for entire duration of project: 25,418	Divide total personnel hours by 2,080 hours in 1 yr = TOTAL FTE: 12.2 FTE
--	---

Total Number of Full-time Equivalents (FTE) Estimated to Be Funded through Contracts with this ENRTF Appropriation:

How many employees a future contractor will use, the hours they will work, or what salary they may pay their employees is not known. What is known is that 2 full-time CCM individual placements will be hired for two years and \$252,200 in contracts will be executed. If approximately 75% of the contracted dollars go towards employees at the same average cost of DNR staff working on this project, below would be a rough estimate of FTEs. This estimate includes the CCM individual placements.

Enter Total Estimated Contract Personnel Hours for entire duration of project: 5,888	Divide total contract hours by 2,080 hours in 1 yr = TOTAL FTE: 2.8 FTE
--	---

VI. PROJECT PARTNERS:

- A. Partners outside of project manager’s organization receiving ENRTF funding-N/A
- B. Partners outside of project manager’s organization NOT receiving ENRTF funding

This proposal includes SNA work towards partnership project work on SNAs. Partners will NOT receive ENRTF Funding through this proposal. Partners include entities, such as The Nature Conservancy, Friends of the Mississippi River, Sugarloaf Northshore Stewardship Assn., local units of governments, and other non-profits.

VII. LONG-TERM- IMPLEMENTATION AND FUNDING:

Without SNA conservation, habitats for rare species and sites of high biodiversity significance are likely to be lost forever. The SNA Strategic Land Protection Plan targets acquisition (on existing public land/through acquisition) to insure the best ecological value for every dollar spent. Achieving SNA habitat management, public engagement and acquisition goals depends upon ongoing support from the ENRTF of \$5M-\$10M per biennium. Annual/biennial appropriations will also be sought from the Outdoor Heritage Fund and state bonding.

VIII. REPORTING REQUIREMENTS:

- Project status update reports will be submitted April 1 and October 1 each year of the project
- A final report and associated products will be submitted between June 30 and August 15, 2023

M.L. 2020 ENRTF Appropriation: \$3,000,000

Project Length and Completion Date: 3 years, June 30, 2023

Today's Date: August 23, 2019

Instructions: Please include on the following list all targeted parcels that you are currently considering for acquisition (fee title or easement) or restoration (all phases) using the appropriation. The list may include more parcels than you will ultimately acquire or conduct restoration work on with the funds. To be eligible as part of your project, however, a parcel must be included on the list. Changes may be requested through the amendment process. Please update the status column and submit with your periodic workplan updates. Include any significant issues related to any particular parcel in your activity and project status sections of your Main Workplan Document.

#	Acquisition or Restoration Parcel Name	Geographic Coordinates (preferably from the center of the parcel) Format: [Deg.]° [Min.]' [Sec.]" [Hemis.]		Estimated Cost	Estimated Annual PILT Liabilities	County	Site Significance (please include what ecosystem (e.g., prairie, forest, wetland, savanna) is represented as well as the ecological significance, site importance, conservation value, and public benefits)	Activity Description (e.g. fee title acquisition, conservation easement acquisition, site preparation, restoration)	# of Acres	# of Shoreline Miles	Type of Landowner (private individual or trust, non-profit organization, for-profit entity)	Proposed Fee Title or Easement Holder (if applicable)	Status of work (e.g. engaged in landowner negotiations, no longer in consideration, restoration activities underway)
		Latitude	Longitude										
1	Boltuck-Rice Forever Wild SNA addition	47° 9' 51.8"	93° 41' 26.2"	\$ 150,000	\$ 1,125	Itasca	Provides better public access to the site and protects old growth forest.	Fee Title Acquisition	25	0.025	Private	DNR-SNA	Proposed
2	Englund Ecotone SNA addition	45° 41' 18.1"	94° 8' 56.6"	\$1,800,000	\$ 13,500	Benton	Provides the only public access to the site and protects additional oak forest, oak savanna, and sedge meadow.	Fee Title Acquisition	300		Private	DNR-SNA	Proposed
3	Falls Creek SNA addition	45° 16' 34.8"	92° 45' 56.1"	\$2,400,000	\$ 18,000	Washington	One of the most diverse forested natural areas remaining in Washington County. Acquisition would expand the Falls Creek SNA by nearly 60%, protect 1200 linear feet of St. Croix river frontage, fill in a protection gap within the St. Croix National Scenic Riverway and provide greater/safer public access.	Fee Title Acquisition	120	0.5	Private	DNR-SNA	In communication with landowners
4	Frenchmans Bluff SNA addition	47° 11' 59.4"	96° 10' 46.5"	\$ 511,000	\$ 3,833	Norman	Dry Sand-gravel prairie in good condition.	Fee Title Acquisition	73		Private	DNR-SNA	In communication with landowners
5	Hythecker Prairie SNA addition	44° 1' 36.4"	93° 1' 56.4"	\$ 320,000	\$ 2,400	Dodge	200 foot grassland buffer on the east and north sides of the SNA to protect prairie from overspray from agricultural fields.	Fee Title Acquisition	40		Private	DNR-SNA	In communication with landowners
6	Lake Bronson Parkland SNA addition	48° 44' 5.7"	96° 32' 12.2"	\$ 150,000	\$ 1,125	Kittson	Borders the Two Rivers river and harbors rare orchids on wet prairie of outstanding biodiversity significance.	Fee Title Acquisition	180	0.25	Private	DNR-SNA	In communication with landowners
7	Mille Lacs Moraine Addition	46° 16' 58.3"	93° 51' 10.9"	\$ 800,000	\$ 6,000	Crow Wing	MBS-mapped forest communities, Red-shouldered hawk, Cerulean Warbler	Fee Title Acquisition	265	0.5	Private	DNR-SNA	In communication with landowners
8	Mound Prairie SNA addition	43° 46' 12.9"	91° 26' 2.7"	\$ 200,000	\$ 1,500	Houston	Protect additional mesic and dry bluff prairie, and provide better management access to the SNA.	Fee Title Acquisition	40		Private	DNR-SNA	In communication with landowners
9	Morton Outcrop SNA addition	44° 33' 3.3"	94° 59' 36.6"	\$ 24,000	\$ 180	Renville	Protect additional rock outcrop and mesic prairie along with additional access to site.	Fee Title Acquisition	3		Private	DNR-SNA	In communication with landowners

10	North Fork Zumbro SNA addition	44° 18' 9.7"	92° 51' 20.6"	\$ 476,000	\$ 3,570	Goodhue	Protect additional floodplain forest and improve public access.	Fee Title Acquisition	68	0.5	Private	DNR-SNA	Proposed
11	Rock Ridge SNA addition	44° 4' 60.0"	95° 6' 4.0"	\$ 640,000	\$ 4,800	Cottonwood	Protect additional rock outcrop prairie.	Fee Title Acquisition	80		Private	DNR-SNA	In communication with landowners
12	Wabu Woods SNA addition	47° 23' 41.7"	93° 37' 0.1"	\$ 350,000	\$ 2,625	Itasca	Shoreline on Deer Lake (lake of outstanding biodiversity significance), Lowland white cedar forest, Red oak-sugar maple-basswood forest, low shrub poor fen.	Fee Title Acquisition	40	0.1	Private	DNR-SNA	In communication with Deer Lake Association
13	Lester Lake SNA	47° 8' 47.2"	94° 45' 53.7"	\$ 15,000	NA	Hubbard	Red Pine-White Pine Forest.	Rehabilitation	10	NA	Public	DNR-SNA	Proposed
14	Badoura JP Woodland SNA	46° 52' 34.1"	94° 40' 37.9"	\$ 30,000	NA	Hubbard	Jack Pine (yarrow) woodland.	Rehabilitation	23	NA	Public	DNR-SNA	Proposed
15	Antelope Valley SNA	44° 40' 31"	96° 07' 17"	\$ 10,000	NA	Yellow Medicine	Wet Saline Prairie, Upland Sandpiper noted onsite	Restoration	16.5	NA	Public	DNR-SNA	Proposed
16	Hemlock Ravine SNA	46° 40' 3.5"	92° 21' 6.0"	\$ 10,000	NA	Carlton	Rehabilitate slide areas/prevent erosion in an imperiled (S2) boreal hardwood forest with eastern hemlock (END).	Rehabilitation	2		public	DNR-SNA	Proposed
17	Mille Lacs Moraine SNA	46° 16' 54.9"	93° 51' 12.4"	\$ 7,000	NA	Crow Wing	Restore former building area within an high-quality oak forest with several special concern bird species and SGCN.	Restoration	1		public	DNR-SNA	Proposed
18	Minnesota Point Pine Forest SNA	46° 43' 4.2"	92° 2' 4.3"	\$ 7,000	NA	St. Louis	Restoration/erosion control in critically imperiled (S1) dune and beach systems with numerous listed species unique to the area.	Restoration	2	0.25	public	DNR-SNA	Proposed

NOTES:The above acquisition list and attached map identifies priority projects for this appropriation. The DNR may request to add other qualifying sites to the list.

Attachment D. Additional Work Plan Information for Acquisition, Easements, and Restoration

Acquisition/Restoration Information:

Fee Title Acquisition

1. Describe the selection process for identifying and including proposed parcels on the parcel list, including explanation of the criteria and decision-making process used to rank and prioritize parcels.

To be acquired and designated as SNA, the site must be recommended for SNA designation in an Ecological Evaluation report, which serves as the site's baseline assessment for fee acquisitions. All such sites are predominantly MBS-mapped native plant communities and contain habitat for rare species and Species of Greatest Conservation Need. In addition, SNA staff use the "SNA Candidate Site Evaluation Guide" (initially developed through the ENRTF-funded SNA strategic planning process) which incorporates criteria to rate which sites are currently pursued. Criteria include diversity and quality of the native habitat, occurrence of rare species, occurrence of native plant communities under-represented in SNA system, parcel size, location of parcel in relation to biodiversity hotspots (particularly MBS-mapped areas of outstanding and high biodiversity significance) and other conservation lands (including SNA Strategic Land Protection Plan's Conservation Opportunity Areas and Minnesota Prairie Conservation Plan's Core Areas), potential for long-term management, and additional factors (e.g. landowner readiness, urgency, and willingness to donate; degree of threat, and partnership opportunities).

2. List all adopted state, regional, or local natural resource plans in which the lands included in the parcel list are identified. Include a link to the plan if one is available.

- *SNA Strategic Land Protection Plan* – <http://www.dnr.state.mn.us/snap/plan.html>
- *Minnesota's State Wildlife Action Plan* – <http://www.dnr.state.mn.us/mnwap/index.html>
- *Minnesota Prairie Conservation Plan* – www.dnr.state.mn.us/prairieplan

3. For any parcels acquired in fee title, a restoration and management must be prepared. Summarize the components and expected outcomes of restoration and management plans for parcels acquired by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation, including how long-term maintenance and management needs of the parcel will be financed into the future.

Each parcel acquired as a new SNA in fee will have an Adaptive Management Plan (AMP) or if as an addition to an existing SNA, that SNAs Management Plan may be amended to add the new parcel. The AMPs include goals, ecological description, priority features with indicators, and management recommendations. The intended outcome of management of SNAs is that 1) all the lands be native plant communities or restored to plant communities that would have been native to the site, 2) these plant communities are sustained over time, and 3) that visitors are accommodated safely (unless visitor access is restricted by designation order). The goals for the SNA's management are based upon soils, topography, geology, and other factors necessary to sustain the plant community. Each plan includes an implementation timetable which summarizes ongoing management needs and a statement on funding. Long-term management costs (e.g. invasive species treatments, prescribed fire, and monitoring/evaluation) will be covered by a combination funding sources, including, but not limited to, ENRTF, Outdoor Heritage Fund (OHF), federal grants, and other funds as appropriated. Each AMP is kept in a DNR internal shared electronic filing system accessible to all SNA staff.

4. For each parcel to be conveyed to a State of Minnesota entity (e.g., DNR) after purchase, provide a statement confirming that county board approval will be obtained.

The DNR follows Minnesota Statutes 84.033 which require that any land acquired for designation as a SNA must have county board approval as prescribed under MS 97A.145.

5. If applicable (see M.S. 116P.17), provide a statement confirming that written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

As part of the DNR acquisition process, all SNA acquisitions are required to have approval of the Ecological and Water Resources Division Director and land conveyances are accepted by the Director or Deputy Director of Division of Lands and Minerals who have delegated authority to approve this for the Commissioner.

Restoration

1. Provide a statement confirming that all restoration activities completed with these funds will occur on land permanently protected by a conservation easement or public ownership.

All restoration/enhancement-related activities done with this appropriation are on lands designated as SNA which the state owns in fee or easement.

2. Summarize the components and expected outcomes of restoration and management plans for the parcels to be restored by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation.

Each restoration/enhancement project will be based upon an ecological restoration and management plan and/or project plan with goals for reconstructing plant communities that are native to the site that are based upon soils, topography, geology, and other factors necessary to sustain the plant community. Each plan includes an implementation timetable which summarizes ongoing management needs. Each restoration and management plan and project plan is kept in a DNR internal shared electronic filing system accessible to all SNA staff.

3. Describe how restoration efforts will utilize and follow the Board of Soil and Water Resources "Native Vegetation Establishment and Enhancement Guidelines" in order to ensure ecological integrity and pollinator enhancement.

The SNA Program follows or exceeds the recommendations found in the BWSR "Native Vegetation Establishment and Enhancement Guidelines". SNA restorations typically follow the current BOWSR Guidelines, including Project Guidance, Plant Community Restoration, Temporary Cover and Forest/Woodlands. The SNA Program follows the general direction of the BWSR Guidelines for "Recommended Steps for Obtaining Plant Materials", and has additional and more restrictive requirements for restoration material sources. Specifically, SNA restorations use seeds of a local ecotype, collected from onsite or within 25 miles. Restoration and management of DNR lands are governed by DNR Operational Order #124 on "Plant Material Standards for Native Plant Community Restoration" and #130 on "Pollinator Habitat" (which include BMPs).

4. Describe how the long-term maintenance and management needs of the parcel being restored with these funds will be met and financed into the future.

Long-term management costs (e.g. invasive species treatments, prescribed fire/disturbance, and monitoring/evaluation) will be covered by a combination of funding sources, including, but not limited to, ENRTF, Outdoor Heritage Fund (OHF), federal grants, and other funds as appropriated.

5. Describe how consideration will be given to contracting with Conservation Corps of Minnesota for any restoration activities.

DNR has a standing general contract with CCM under which the SNA Program often does project or activity specific agreements. For restoration and site improvement projects, CCM has been and will continue to be used when appropriate for hand seed harvest, invasive species treatment, prescribed burning, and will be considered on restoration projects for post-planting weed control.

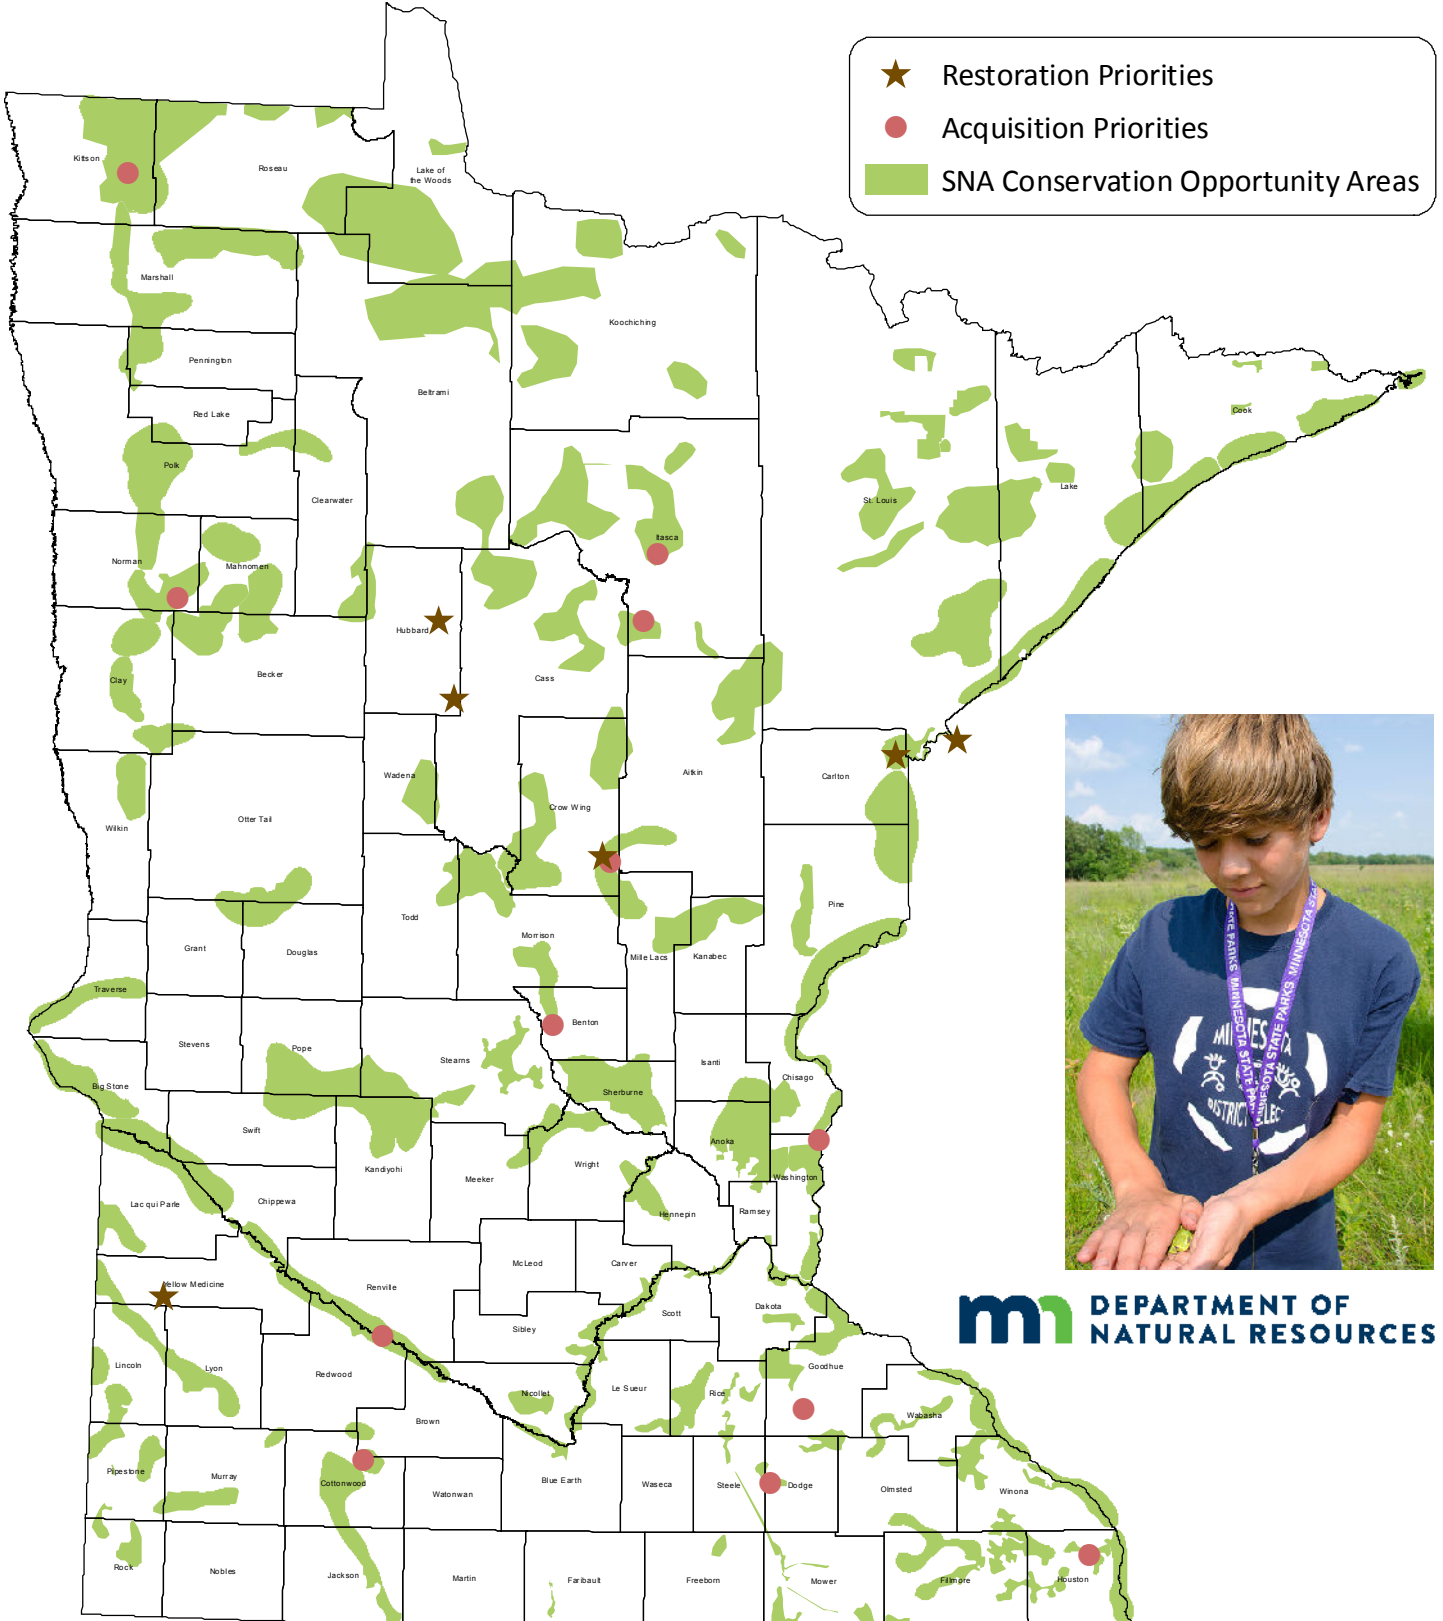

6. Provide a statement indicating that evaluations will be completed on parcels where activities were implemented both 1) initially after activity completion and 2) three years later as a follow-up. Evaluations should analyze

improvements to the parcel and whether goals have been met, identify any problems with the implementation, and identify any findings that can be used to improve implementation of future restoration efforts at the site or elsewhere.

Plant community reconstruction and rehabilitation projects will be evaluated and a report submitted to the LCCMR to ascertain how well the native plants have been established and non-natives controlled. Each evaluation report will include a summary of management plan outcomes, activities completed through the project, map of the project area, statement of ongoing management needs and funding, and summary of the evaluation.
