

Environment and Natural Resources Trust Fund

2027 Request for Proposal

General Information

Proposal ID: 2027-336

Proposal Title: Metropolitan Regional Parks System Land Acquisition Phase 10

Project Manager Information

Name: Jessica Lee

Organization: Metropolitan Council

Office Telephone: (651) 602-1621

Email: jessica.lee@metc.state.mn.us

Project Basic Information

Project Summary: Acquire properties with high-quality natural resources or natural resources restoration potential for the metropolitan Regional Parks System. This project will be matched over 100% with Council and local Agency funds.

ENRTF Funds Requested: \$3,000,000

Proposed Project Completion: June 30, 2031

LCCMR Funding Category: Land (F)

Project Location

What is the best scale for describing where your work will take place?

Region(s): Metro

What is the best scale to describe the area impacted by your work?

Region(s): Metro

When will the work impact occur?

During the Project and In the Future

Narrative

Describe the opportunity or problem your proposal seeks to address. Include any relevant background information.

The Metropolitan Regional Parks and Trails System offers large-scale, natural-resource based recreation opportunities to all Minnesotans. This project proposes to acquire park and trail inholdings that have a broad range of ecological significance, from native prairies, wetlands, forests, and shoreline protection, to potentially creating a new regional park that will protect a significant creek and lake. These properties are at risk of being developed if they are not acquired for the Regional Parks and Trails System. Many of these parcels are along water bodies and will provide shoreline protection. Acquiring these lands will contribute to the equitable use of the Regional Parks and Trails System by increasing access and protecting properties for public use in perpetuity. This proposal seeks to address the opportunity of acquiring park and trail inholdings by providing funding for the agencies so they can act quickly when properties become available. This funding will be available through a grant process that provides acquisition funding on a first-come, first-served basis for eligible acquisitions. Council staff will assist with the acquisition process and bring each individual request to the Met Council for approval.

What is your proposed solution to the problem or opportunity discussed above? Introduce us to the work you are seeking funding to do. You will be asked to expand on this proposed solution in Activities & Milestones.

The Metropolitan Regional Parks and Trails System is owned and operated by the ten Regional Parks Implementing Agencies identified in Minnesota Statutes, section 473.351. Working with the Agencies, the Council has compiled a list of properties that have the potential to be acquired between July 1, 2027 and June 30, 2031. The properties range in size from one acre to over 200 acres, with the average size of 50 acres. Over half of these properties are along lakes, rivers, or streams with an average of over half a mile of shoreline. Some of these properties are under active negotiation; for others, the sellers have expressed an interest in selling to the Agency or are aware of the Agency's interest. Because the timing is uncertain as to when properties will be available from willing sellers, this proposal builds a funding pool which allows Agencies to capitalize on opportunities as they arise. The Council will work with agencies to acquire properties as they become available through a first-come, first-served grant process. Individual grant requests will need approval from the Met Council.

What are the specific project outcomes as they relate to the public purpose of protection, conservation, preservation, and enhancement of the state's natural resources?

This project will acquire private lands from willing sellers for the Regional Parks and Trails System to provide public access to natural resource-based, high-quality recreational opportunities, while protecting and restoring prairies, forests, wetlands, and shoreline. Acquiring these inholdings will expand conservation corridors and help build out parks, trails, and park reserves for future generations of recreation and natural resources protection.

Activities and Milestones

Activity 1: Acquire properties for the Regional Parks System

Activity Budget: \$3,000,000

Activity Description:

The Agencies individually negotiate each acquisition. After they have obtained a signed purchase agreement, a certified appraisal, and a resolution of support from their elected boards, the Agencies submit a grant request to the Metropolitan Council. Agencies may close on the properties after the Council has approved the acquisition grant request. The Council serves as the fiscal agent and awards grants to the Agencies through its Park Acquisition Opportunity Fund (PAOF) program. The PAOF program has four funding sources: Environment and Natural Resources Trust Fund (ENRTF), Parks and Trails Legacy Fund (Legacy), and local and regional matching dollars. The Council matches every \$3 in ENRTF and Legacy funds with \$2 in Council funds. Agencies provide at least 25% of acquisition costs from non-state funds. The Council is requesting \$3,000,000. These funds will be matched with \$2,000,000 in Council funds, and an additional \$1,666,667 in Agency funds, for a total project budget of \$6,666,667. This work includes ensuring recipients are adhering to the ENRTF funded land acquisition requirements including recording NOFRs, valuation, cost, and transaction reporting, initial acquisition reporting, and ensuring annual reporting on lands acquired.

Activity Milestones:

Description	Approximate Completion Date
Staff accepts FY2028 applications, presents to Council for approval, creates grant agreements, agencies acquire properties	June 30, 2028
Staff accepts FY2029 applications, presents to Council for approval, creates grant agreements, agencies acquire properties	June 30, 2029
Staff accepts FY2030 applications, presents to Council for approval, creates grant agreements, agencies acquire properties	June 30, 2030
Staff accepts FY2031 applications, presents to Council for approval, creates grant agreements, agencies acquire properties	June 30, 2031
Final reporting requirements for the Agencies and the Council are met	June 30, 2031

Project Partners and Collaborators

Name	Organization	Role	Receiving Funds
Tony Wotzka	Dakota County	Greenways Manager	Yes
Kelly Grissman	Three Rivers Park District	Director of Planning	Yes
Sharon Price	Washington County	Acquisition Manager	Yes
Patty Freeman	Scott County Parks and Trails	General Manager	Yes
Sam Pertz	Carver County Parks	Parks and Trails Supervisor	Yes
Adam Arvidson	Minneapolis Park & Recreation Board	Director of Strategic Planning	Yes

Dissemination

Describe your plans for dissemination, presentation, documentation, or sharing of data, results, samples, physical collections, and other products and how they will follow ENRTF Acknowledgement Requirements and Guidelines.

Council staff will work with the park agencies to ensure ENRTF signs, logos, and attribution language are placed where appropriate. Agencies will acknowledge ENRTF in news releases and articles highlighting ENRTF acquisitions.

Long-Term Implementation and Funding

Describe how the results will be implemented and how any ongoing effort will be funded. If not already addressed as part of the project, how will findings, results, and products developed be implemented after project completion? If additional work is needed, how will this work be funded?

This project will provide funding for an existing program managed by the Metropolitan Council, the Park Acquisition Opportunity Fund (PAOF) program. As properties become available for purchase, Agencies will apply to the PAOF program to receive funding. These applications are presented to the Metropolitan Parks and Open Space Commission, then the Council's Community Development Committee, and then receive final approval from the full Metropolitan Council. After the project has been approved, the Agency enters into a grant agreement with the Council. Council staff then works with the Agency throughout the acquisition process, until final reimbursement and reporting is submitted.

Other ENRTF Appropriations Awarded in the Last Six Years

Name	Appropriation	Amount Awarded
Metropolitan Regional Parks System Land Acquisition-Phase 7	M.L. 2021, First Special Session, Chp. 6, Art. 6, Sec. 2, Subd. 09e	\$2,250,000
Metropolitan Regional Parks System Land Acquisition-Phase 6	M.L. 2021, First Special Session, Chp. 6, Art. 5, Sec. 2, Subd. 09h	\$1,000,000
Metropolitan Regional Parks System Land Acquisition - Phase 8	M.L. 2024, , Chp. 83, Art. , Sec. 2, Subd. 09e	\$3,000,000

Project Manager and Organization Qualifications

Project Manager Name: Jessica Lee

Job Title: Planning Analyst

Provide description of the project manager's qualifications to manage the proposed project.

Jessica Lee has obtained and managed several ENRTF appropriations for the Metropolitan Council, where she has worked for 7 years as a planner and program manager. Lee manages state and council funds that are passed through to the ten regional park implementing agencies, including Parks and Trails Legacy Fund, state and council bonds, and ENRTF. One of her main roles is to work with the ten agencies to acquire land for the regional parks and trails system through the Park Acquisition Opportunity Fund, a grant program that is funded partially by ENRTF. Prior to her work at the Council, Lee worked at the MDNR where she managed the Conservation Partners Legacy grant program from the Outdoor Heritage Fund. Before moving to Minnesota, Lee worked for the North Dakota Parks and Recreation Department where she managed the Land and Water Conservation Fund and the federal Recreational Trails Program.

Organization: Metropolitan Council

Organization Description:

The Metropolitan Council is the regional policy-making body, planning agency, and provider of essential services for the Twin Cities metropolitan region, including Metro Transit's bus and rail system, Metro Mobility, Transit Link, wastewater treatment services, planning, affordable housing, and regional parks. The Twin Cities metropolitan area is home to a system of regional parks and trails that are nationally renowned for their beauty, size, and variety of features. The Regional Parks and Trails System attracted over 65 million visits in 2024. With 58 regional parks and park reserves, nearly 500 miles of interconnected trails, and 8 special recreation features, the 65,000-acre system provides a wealth of opportunities for recreation and exercise while preserving significant natural resources and wildlife habitat. While operated by partnering cities, counties, and special districts, the Council is charged with overseeing the acquisition and development of regional parks and trails.

Fee Acquisition

1. Describe the selection process for identifying and including proposed parcels on the parcel list, including an explanation of the criteria and decision-making process used to rank and prioritize parcels.

The Regional Parks Implementing Agencies have identified parcels that are within their approved park or trail boundaries (or soon to be) and have high natural resource value or restoration potential. These inholdings are currently in private ownership but negotiations have begun in hopes of the Agencies acquiring these properties to protect or restore their natural resources and provide access to the public. The Agencies have identified all properties that meet this criteria and have potential to be acquired within the next few years. Because all of the parcels on this list are crucial to completing the Regional Parks and Trails System and they all have natural resources value, parcels will be funded as they become available by willing sellers, on a first-come-first-served basis.

2. List all adopted state, regional, or local natural resource plans in which the lands included in the parcel list are identified for the acquisition purposes you propose. Include the URL to the plan if one is available.

Each parcel on this list has been included in a regional park or trail long-range Plan. Each regional park or trail has its own long-range plan with a plan boundary that identifies all future acquisitions. These long-range plans are developed by the Agencies, and the Agency Boards have approved them. In addition, these long-range plans have been approved by the Metropolitan Council upon recommendation from the Metropolitan Parks and Open Space Commission and the Metropolitan Council's Community Development Committee. Each long-range plan should be available on the corresponding Agency's website or by request. The only exceptions are Miller Lake, which is an approved Regional Park Search Area as noted in the Regional Parks Policy Plan, and Baylor Regional Park. The long-range plan for Miller Lake will be completed and approved before funding is available for this acquisition. The long-range plan for Baylor Regional Park is being amended to include these additional parcels as they provide a unique opportunity to expand natural resources protection.

3. For any parcels acquired in fee title, a restoration and management plan must be prepared. Summarize the components and expected outcomes of restoration and management plans for parcels acquired by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation, including how long-term maintenance and management needs of the parcel will be financed into the future.

The Agencies will prepare their own restoration and management plan for each parcel acquired. These plans will identify activities and timelines for natural resource restoration work if needed. They will also identify the long-term maintenance and management needs, the time frame for those needs, and the sources of funding to meet those needs. The Agencies will keep these on file for reference.

4. For each parcel to be conveyed to a State of Minnesota entity (e.g., DNR) after purchase, provide a statement confirming that county board approval will be obtained.

These parcels will be purchased and held by the Agencies. They are all required to obtain county or park board approval before purchase and proof of approval is included in the Met Council business items awarding the acquisitions.

5. If applicable (see M.S. 116P.17), provide a statement confirming that written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

Not applicable

Easement (Other) Acquisition

1. Describe the selection process for identifying and including proposed parcels on the parcel list, including an explanation of the criteria and decision-making process used to rank and prioritize parcels.

The Regional Parks Implementing Agencies have identified parcels that are within their approved park or trail boundaries and have high natural resource value or restoration potential. These inholdings are currently in private ownership but negotiations have begun in hopes of the Agencies acquiring these properties to protect or restore their natural resources and provide access to the public. The Agencies have identified all properties that meet this criteria

that have potential to be acquired in the next three years. All of the parcels on this list are crucial to completing the Regional Parks and Trails System. Parcels will be funded as they become available, on a first-come-first-served basis. Most of the easements included in this proposal will help protect wetlands and/or shoreline of rivers, creeks, or lakes, along with providing recreation opportunities. Acquiring these easements will prevent private development along these water bodies, protecting water quality and habitat for fish and wildlife. Please note: the parcels listed have all been listed as "fee title" as that is the preferred approach. However, sometimes it may be more efficient or effective to pursue a trail easement for the regional trails, so it is possible that some of the parcels listed will be changed from fee title to easement.

2. List all adopted state, regional, or local natural resource plans in which the lands included in the parcel list are identified for the acquisition purposes you propose. Include the URL to the plan if one is available.

Each parcel on this list has been included in a regional park or trail long-range plan. Each regional park or trail has its own long-range plan with a plan boundary that identifies all future acquisitions. These long-range plans are developed by the Agencies, and the locally-elected Agency Boards have approved them. In addition, these long-range plans have been approved by the Metropolitan Council upon recommendation from the Metropolitan Parks and Open Space Commission and the Metropolitan Council's Community Development Committee. Each long-range plan should be available on the corresponding Agency's website or by request.

3. For any parcels acquired in fee title, a restoration and management plan must be prepared. Summarize the components and expected outcomes of restoration and management plans for parcels acquired by your organization, how these plans are kept on file by your organization, and overall strategies for long-term plan implementation, including how long-term maintenance and management needs of the parcel will be financed into the future.

The Agencies will prepare their own restoration and management plan for each parcel acquired. These plans will identify activities and timelines for natural resource restoration work if needed. They will also identify the long-term maintenance and management needs, the time frame for those needs, and the sources of funding to meet those needs. The Agencies will keep these plans on file for reference.

4. For each parcel to be conveyed to a State of Minnesota entity (e.g., DNR) after purchase, provide a statement confirming that county board approval will be obtained.

These parcels will be purchased and held by the Agencies. They are all required to obtain county or park board approval before purchase and proof of approval is included in the Met Council business items awarding the acquisitions.

5. If applicable (see M.S. 116P.17), provide a statement confirming that written approval from the DNR Commissioner will be obtained 10 business days prior to any final acquisition transaction.

Not applicable

Administrative Use

Does your project include restoration or acquisition of land rights?

Yes: Easement (Other) Acquisition, Fee Acquisition,

Do you understand that travel expenses are only approved if they follow the "Commissioner's Plan" promulgated by the Commissioner of Management of Budget or, for University of Minnesota projects, the University of Minnesota plan?

N/A

Does your project have potential for royalties, copyrights, patents, sale of products and assets, or revenue generation?

No

Do you understand and acknowledge IP and revenue-return and sharing requirements in 116P.10?

N/A

Do you wish to request reinvestment of any revenues into your project instead of returning revenue to the ENRTF?

N/A

Does your project include original, hypothesis-driven research?

No

Does the organization have a fiscal agent for this project?

No

Does your project include the pre-design, design, construction, or renovation of a building, trail, campground, or other fixed capital asset costing \$10,000 or more or large-scale stream or wetland restoration?

No

Is the purpose of the acquisition for construction of a building(s), trail, campground, or other fixed capital asset costing \$10,000 or more or large-scale stream or wetland restoration, either now or in the future?

No

Do you propose using an appropriation from the Environment and Natural Resources Trust Fund to conduct a project that provides children's services (as defined in Minnesota Statutes section 299C.61 Subd.7 as "the provision of care, treatment, education, training, instruction, or recreation to children")?

No

Provide the name(s) and organization(s) of additional individuals assisting in the completion of this proposal:

Regional park implementing agency staff have helped provide information for this proposal.

Do you understand that a named service contract does not constitute a funder-designated subrecipient or approval of a sole-source contract? In other words, a service contract entity is only approved if it has been selected according to the contracting rules identified in state law and policy for organizations that receive ENRTF funds through direct appropriations, or in the DNR's reimbursement manual for non-state organizations. These rules may include competitive bidding and prevailing wage requirements

N/A
